The EDI parameter 'DEL_ALL_ACT_QTY' can be used to assess the delivered quantities for the order items. The system parameter 'LOTS_DEL_CUST_SIGNATORY' can be used to assess the signatory for the orders. An amendment has been made to the 'DEL' messages for a trip to assess the quantities separately to the signatory. An appropriate message will be generated for when a 'DEL' message cannot be sent with respect to those parameters. Auditing has been reinstated for trip and order events.
