

EMERGENCY RELEASE - CTMS 11.0

RELNOTE ER045-015

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks
DATA_ADM_SYSTEM_PARAM_527603.sql	Database Script	1.1	527603	21754	2	<p>The system parameter 'PAR_AUDIT' can be set to 'Y' to include auditing of the import process in the STP version of the Paragon API.</p> <p>The system parameter 'PARAGON_RUNNING' will be used to indicate if the STP version of the Paragon API is importing data - it will not be editable by the users.</p> <p>The import process in the STP version of the Paragon API will set the orders for manual scheduling when they are temporarily unscheduled from their temporary trips or their Paragon trips.</p> <p>Then, those orders will not be reprocessed by the 3PL scheduling engine.</p> <p>The 3PL scheduling engine will not start when the Paragon API is processing.</p> <p>Then, these processes will not be updating concurrently any of the same trips and orders; plus the rate processing should be improved.</p> <p>However, the import process in the STP version of the Paragon API will not wait should the 3PL scheduling engine be processing.</p>

Ready for **What's Next, Now™**

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks
DP_3PL_SCHED.sql	3PL Scheduling Engine Package	5.11	"	"	"	"
DP_PAR_API_STP.sql	STP Paragon API Package	5.23	"	"	"	"
OMS.sql	Order Management Package	5.334	"	"	"	"

New Parameters			
Parameter Name	Config Level	Setting Value	Result
PAR_AUDIT	SYSTEM	Y	The STP version of the Paragon API will write audit records for the import process.
PAR_AUDIT	SYSTEM	N	The STP version of the Paragon API will not write audit records for the import process.
PARAGON_RUNNING	SYSTEM	Y	The STP version of the Paragon API is importing data.
PARAGON_RUNNING	SYSTEM	N	The STP version of the Paragon API is not importing data.

Note: Version 5.23.1.1 of DP_PAR_API_STP needs to be compiled on the STS databases.
