EMERGENCY RELEASE - CTMS 11.0

RELNOTE ER045-021

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks
DP_CTMS_IMPORT.sql	API Import Package	5.38	00529028	20979	2	The EDI parameter 'UPDATE_PARAGON_ID' for the 'API' process will be used to update the new locations for the orders with a Paragon ID and a delivery depot. The UNKNOWN locations for the order will create new collection and delivery locations based on the postcode. The Paragon ID will be based on the customer code and the location code. The delivery depot for Paragon for the new location will be based on the planning depot for the planning region of the location for its postal region. This planning depot will be used in preference to the depot code of the collection location for an order for a delivery, or to the depot code for the delivery location for an order for a collection.

Ready for **What's Next, Now**™
