

EMERGENCY RELEASE - CTMS 12.0

RELNOTE ER045-032

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks
DP_PAR_API_STP.sql	STP Paragon API Package	5.26	00539920	-	2	The auditing for Paragon will use the name of the EDI process to assess test 'AUDIT_WS' parameter. The auditing will include the content of the message as well as the endpoint.

NOTE: Version 5.26.1.1 will need to be released to the STP databases

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks
DP_PAR_API_STP.sql	STP Paragon API Package	5.27	00540264	22118	2	A new EDI parameter called 'USE_RUN_DEPOT' is available to use the depot for the route for the run number of the order in preference to the depot of the collection/delivery location of the RET/SLS/ order. When this parameter is 'Y', the depot for the route for the run number will be the depot to send to Paragon via the API. This parameter is expected to be set for the 'Paragon_Outbound' process.

NOTE: Version 5.27.1.1 will need to be installed in the STS databases.

Ready for **What's Next, Now™**
