EMERGENCY RELEASE - CTMS 12.0

RELNOTE ER045-058

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks
DATA_ADM_SYSTEM_PARAM_02683404.sql	Database Script	1.1	02683404	-	3	The 'Loading Management' screen displays a new tick box called 'Include Completed Trips' to enable the trips to be included or excluded when they have a status of 'COMPLETED'. This box will be ticked by default. A new system parameter called 'PAR_DUN_TRUNK_CUTOFF_TIME' can be configured at the system level to set a cut-off time to apply to trunk trips to use the current schedule for the day. The import process from Paragon for the 'DUN' format will refer to the new system parameter to offset the date to derive the schedule for the processing of the trunk trips. If 'PAR_DUN_TRUNK_CUTOFF_TIME' is set to '04:00' and the current system time is '01:00' then the schedule will not be derived for the current date but for the previous date as if the process for the route/drop had been run on the previous evening.
