

EMERGENCY RELEASE - CTMS 12.0

RELNOTE ER045-059

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks
DATA_ADM_SYSTEM_PARAM_02910494.sql	Database Script	1.1	02910494 -		3	A new system parameter called 'PAR_DUN_TRUNK_OFFSET_DAYS' is available to store the number of days for which trunk trips will be assessed for the radial trips that are created by Paragon. A default value of 4 days will be used but the number of days will be configurable to assess the non-working days for the depot. This system parameter can be used to account for the non-working days during the period of the holiday seasons. The system parameter 'PAR_DUN_TRUNK_CUTOFF_TIME' will start to assess the current date prior to the cutoff time, or from tomorrow after the cutoff time.
PAR.sql	Paragon Package	5.116	"	"	"	"
