

EMERGENCY RELEASE - CTMS 12.0

RELNOTE ER CTMS 047-097

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks
DATA_ADM_SYSTEM_PARAM_620865.sql	Database script	1.1	620865	PROD-CTMS-669852-97	2	A new system parameter LOTS_SEND_TENDERED has been created to control this new functionality. Trigger points which currently check the status of a trip have been amended to check the new system parameter and they will not send any messages to LOTS if the parameter is inactive (i.e. where the setting value = "N"). The default setting is now "Y" (differs to the original requirement) to avoid stopping data being sent until it is specifically requested to be inhibited).
TRG_SHA_LOTS.sql	Database trigger	5.10	"	"	"	"
TRG_STS_XML_OUT.sql	Database trigger	5.40	"	"	"	"
TRG_SCH_TRIP_XML_INT.sql	Database trigger	5.43	"	"	"	"

New Parameters			
Parameter Name	Config Level	Setting Value	Result
LOTS_SEND_TENDERED	SYSTEM	Y	If the trip is still at TENDERED status, then TRP message will be sent to LOTS.
LOTS_SEND_TENDERED	SYSTEM	N	If the trip is still at TENDERED status, then no TRP message will be sent to LOTS.
