

EMERGENCY RELEASE - CTMS 12.0

RELNOTE ER CTMS 047-105

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks
AT_SCH_ORD_REFERENCE_620885.sql	Database Script	1.1	620885	669852-55	1	<p>The new system parameter that is called 'TIMI_EXTRACT' can be set to 'Y' so that data will be extracted for a file to send to the TIMI system.</p> <p>New import decodes will need to be created for 'TIMI_TRACKING_REASON' which will be used to map the reason codes that are used for the items for the events in Calidus to the tracking codes that are used in TIMI.</p> <p>For example, reason code 'SC' will indicate that an item has been collected, and reason code 'SU' will indicate that an item has been unloaded.</p> <p>These reason codes will be decoded with a tracking reason of 'LOAD' and 'UNLOAD' respectively and the location of the scan will then be used to derive the tracking code for TIMI.</p> <p>For example, reason code 'SC' will be converted to tracking code '2100' if the item is not scanned at a depot, and reason code 'SU' will be converted to tracking code '2210' if the item is scanned at a depot.</p> <p>EDI parameters can be set for the EDI process which may exist for a customer and/or a cost centre, or neither a customer nor a cost centre:</p>

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks
						FTP_PROTOCOL = SFTP (to use a secure connection to transfer the files to TIMI) TIMI_EXTRACT = Y (to identify that the TIMI process exists) INCLUDE_2100 = Y (to include the 2100 tracking events if they are appropriate) INCLUDE_4100 = Y (to include the 4100 tracking events if they are appropriate) A branched version 1.11.1.1 of DP_FLEXIPOD will be released to the 19c databases which will use APOD.

New Parameters			
Parameter Name	Config Level	Setting Value	Result
TIMI_EXTRACT	SYSTEM	N	Data will not be extracted for a file to send to the TIMI system.
TIMI_EXTRACT	SYSTEM	Y	Data will be extracted for a file to send to the TIMI system.
