

EMERGENCY RELEASE - CTMS 12.0

RELNOTE ER CTMS 047-148

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks
DP_CTMS_IMPORT.sql	API Package	5.61	749051	-	3	<p>Some of the orders have been rejected because the customers or the locations for the external reference do not exist yet.</p> <p>Some of the orders have been created due to concurrent processing by MuleSoft when MuleSoft should not be sending multiple messages for the orders. The multiple messages were a result of an outage at MuleSoft when no orders were sent to CTMS for a few days. The EDI parameter OMS_UNIQUE_EXT_REF can be set to Y to prevent duplicate orders for the same external reference and the same early collection date. The message for the order API will use the key code to find the control record rather than find the latest order using the external reference when there is concurrent processing.</p>
