

EMERGENCY RELEASE - CTMS 12.0

RELNOTE ER CTMS 048-047

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks
DP_FLEXIPOD.sql	APOD Package	1.27	840010	-	3	Items that have not been scanned with a result code will not update the order. Version 1.27.1.1 will need to be released to the 19c databases.

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks
DP_FLEXIPOD.sql	APOD Package	1.28	839574	Issue 149	3	The Start field for the Manifest will contain the planned departure date and time from the depot (i.e. the first SU stop on the trip). This date and time should be fixed to the start time of the route/run number. This date should then be the same date as the dates of the collection/delivery drops. Therefore, any actual dates and times that are set by the driver will not be used in the Start field for the Manifest should any orders be added to the trip later when it is EN-ROUTE. Using the same date for the Start of the Manifest and the collection/delivery drops should prevent any confusion in the APOD console. The schedule of the manifest should then be found on the same date as its drops. Version 1.28.1.1 will need to be released to the 19c databases.
