

EMERGENCY RELEASE - WMS 810

RELNOTE ER044-012

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks
DP_WMS_ALLOC.sql	WMS Allocation	4.209	02798128	-	2	<p>The issue is full pallets held in pick pallet locations are being processed as 'dummy' picks.</p> <p>Change is that if SAPP rule enabled, and the ordered quantity is a pallet or more, bulk locations are prioritised over pick locations, meaning allocation will chose full pallet from bulk locations before selecting stock in a pick location. If the SAPP rule is not enabled, or the ordered quantity is less than 1 pallet in quantity, the system will work as expected, with no change in functionality. Fix issue with IAJD (audit) records to ensure that the data written comes from the 'picked' pallets rather than the 'dummy' pick record.</p> <p>NOTE: If the only pallet/s are in a pick location, they will be processed as dummy picks, even if the quantity is a full pallet quantity.</p> <p>Also ensure that when an order that contains a dummy pick is picked using RDT pick functionality, the 'PICK' audit records are correctly populated. Ensure the audit record comes from actual 'picked' pallet record, rather than 'dummy' pallet record.</p>
DP_RDT_PICK_CONF.sql	RDT pick confirmation	4.144	"	"	"	"

NOTE: RF Maintenance setup changes

Ready for **What's Next, Now™**

'Enter Despatch Pallet Types' flag should be changed from 'Part Picks and Full Pallet Picks' to 'Disabled'.
