1 Ford Orders EDI

Ford EDI is a DHL AA interface, which is a pass-through from DHL Link from SAP.

1.1 Content

The content is XML from SAP, containing

- Shipments - the shipment details, plus child nodes
 - ◆ Ship_unit - the pallets
 - ◆ ship_unit_row - the pallet and details
 - ◆ Shipping_line/shipping_line_row - the order line contents

Sample file:

- [File:Ford EDI Sample.zip](#)

1.2 Process

Package DP_FORD_EDI_IN

Process_file_orig - presumably old.

Process_file - presumably new

Basically,

- Finds the order
- Stores the items and contents onto standard EDI tables
- Then processes them to update the order
 - ◆ Adds Items
 - ◆ Adds contents
 - ◆ Generates order lines

1.3 Implementation

Create an EDI
