# 1 SUMMARY INTRODUCTION

## 1.1 INTRODUCTION

The main aim of this document is to provide *CALIDUS* TMS users with the level of detail required to accurately test all software included in the patch. The document also contains set-up and configuration details to enable the user to configure the system correctly for the new functionality to work.

### 1.1.1 GLOSSARY OF TERMS

Term	Meaning
C-TMS	Transport Management System
C-WMS	Warehouse Management System
CR	Change Request
C-WCS	Warehouse Control System
C-ePOD	Electronic Proof of Delivery
C-MCS	Mobile Control System
C-TTM	Track and Trace Management
EDI	Electronic Data Interchange
TID	Testing Issue Development, or Log

## **1.2 TESTING PROCESS**

### **1.2.1 TIDs AND RESOLUTION**

If there are any areas of the functionality that are not acceptable or do not meet the requirement specified in the Change Request then these should be expressed by raising a TID.

### **1.2.2 FINAL 'END TO END' TESTING**

Prior to release to a production database, a full 'End to End' test is required on the test system by all sites using the database. Once this is signed off, a release date can be arranged.

### **1.2.3 AUTHORISATION**

Authorisation from nominated release personnel only will be required when requesting a release to a production environment

## 2 CHANGE REQUESTS

### 2.1 Customer Ref: 339678

<b>OBS Log Number:</b>	339678
<b>Reporter:</b>	Michelle Naumovski
<b>Summary of Call</b>	Multi country location entry - Validation A new system parameter called GEO_LOC_CUST_CTRY will be available to 'Enable a customer to be specified for a location to be maintained for one of multiple countries'.
<b>Detail of Fix</b>	When the system parameter is set to Y an 'International Customer' will be available in the 'Location' maintenance screen to enable a different country to be selected than otherwise would be available when cost centre segregation is active and the user does not have access to the country for its customer group and customers.  The International Customer and Country Code can also be specified for a new location when one is created via the 'Order Entry' screen.  The selected customer will need to have its countries listed in the 'Customer' maintenance screen in new tab page 'Countries' which will need to be authorised.

#### Set-up and Configuration

Registry/Rules Settings		
Path & Name	Setting Value	Result
GEO_LOC_CUST_CTRY	Y	Enables a customer to be specified for a location for one of multiple countries to override the cost centre segregation for the user.
GEO_LOC_CUST_CTRY	N	The existing functionality will apply

### 2.2 Customer Ref: 339950

<b>OBS Log Number:</b>	339950
<b>Reporter:</b>	Hayley Keegan
<b>Summary of Call</b>	New Rate cards required

<b>Set-up and Configuration</b>	No set-up/configuration required

### 2.3 Customer Ref: 341062

<b>OBS Log Number:</b>	341062
<b>Reporter:</b>	Neil Baldwin
<b>Summary of Call</b>	Add dates to the Fixed cost report Re-write TRIP_FIXED ORS extract to add dates from first stop. Will need to manually re-create any extracts previously written with old format.
<b>Detail of Fix</b>	
<b>Set-up and Configuration</b>	No set-up/configuration required

### 2.4 Customer Ref: 341177

<b>OBS Log Number:</b>	341177
<b>Reporter:</b>	Peter Blackburn
<b>Summary of Call</b>	Additional LOTS copy files for GENESEBNE
<b>Detail of Fix</b>	Changes to the LOTS copy function to allow VLD and VLI to be included as events
<b>Set-up and Configuration</b>	No set-up/configuration required

### 2.5 Customer Ref: CR-30

**2.9 Customer Ref: SCR-010**

**OBS Log Number:** 342560  
**Reporter:** Colin Lowe  
**Summary of Call** Charge by Header or Line  
**Detail of Fix** The new system parameter called ACC\_LINES\_OR\_HEADER should be set to Y for the customers that will rate by DU or order header levels but not by both types of contracts for the order revenue calculations.

**Set-up and Configuration**

Registry/Rules Settings		
Path & Name	Setting Value	Result
ACC_LINES_OR_HEADER	Y	The order will be rated for the line level only and not also for the header level for the contract
ACC_LINES_OR_HEADER	N	The order will be rated as at present for both levels should they be set up for the contract

 A new EDI parameter EVENT\_ACTION has been created to set the first value of the EVENT\_ACTION field for a given trip.

**Detail of Fix**

Also a new system parameter has been created 'REBOOK\_ALT\_STATUS' which prevents the status of rebooked orders being changed, prevents the original item\_identifier from being prefixed with an X and moves items contents to the new order.

The 'REBOOK\_ALT\_STATUS' parameter also enables the new features within the CN\_DATA\_EXTRACT and prevents microlise from removing the \_R{COUNT} suffix.

**Set-up and Configuration**

No set-up/configuration required

**2.13 Customer Ref: DH-AFDD6B****OBS Log Number:** 339157**Reporter:** Daniel Hammond**Summary of Call** RIO: Opening up multiple DU types**Detail of Fix** Allow users to create CHARGE params for du types and exclude zero despatched lines from rating using ACC\_ZERO\_DESPATCHED**Set-up and Configuration**

<b>OBS Log Number:</b>	342129
<b>Reporter:</b>	Michelle
<b>Summary of Call</b>	Auto-scheduling query The scheduling engine has been changed to enable various scenarios to create and updated trips for the fixed routes as the orders are scheduled at different stages for the trips based on the network solution.  Primarily, the changes relate to trips via the Park locations.  Changes include ensuring that the cut-off times are assessed in the format MI:SS (i.e. nn:nn when entered as n:nn).
<b>Detail of Fix</b>	Ensuring that the collection and delivery stops are created using the route sequence number for when trip stops exist with the same route sequence number (which may be for collection, delivery or both activities) or stops do not exist.  Ensuring that the first stop on the trip sets its planned arrival and departure times to the appropriate cut-off and start times of the fixed route itself or the fixed route stop. This includes when empty locations are deleted and then recreated as a hub location for the carrier of the trip.  Ensuring that the orders are transported to the local depot from the Park location for next day delivery when they are not being delivered on a radial route via the Park on the same day.

Summary of Call	Public holiday set-up query/discrepancy The time windows for orders entered via C-TMS, Portal or XML files will be calculated based on the available routing for when the routes are inactive for the weekend or for a public holiday.
Detail of Fix	A range of collection dates can be derived for the earliest date that the order can be collected from its source location and for the latest date that the order can be despatched from its local 'collection' depot for onward delivery. The delivery date will remain a single date but it will be calculated from the latest collection date for the order.

<b>Summary of Call</b>	Weekend Portal Selection 338477 The Collect and Deliver flags for the service level of the order (i.e. the delivery type) will be used to allow a collection or a delivery to be made on the day at the weekend even if the radial or trunk route is not active on that day.  The public holidays for the local depot and the country will still apply to ensure that the collection or delivery is not made on the day at the weekend even if the service level is active on that day.
<b>Detail of Fix</b>	If the radial or trunk route is active on the day at the weekend the public holiday for that route will apply to ensure that the collection or delivery is not made on that day.  The trunk route will be assessed with reference to the Collect and Deliver flags for the service level like the radial route because these flags are expected to be set for service levels that do not have schedule rules (i.e. not Standard) and thus are usually assessed as collect and deliver on the same day.
