1 SUMMARY INTRODUCTION

1.1 INTRODUCTION

The main aim of this document is to provide *CALIDUS* TMS users with the level of detail required to accurately test all software included in the patch. The document also contains set-up and configuration details to enable the user to configure the system correctly for the new functionality to work.

1.1.1 GLOSSARY OF TERMS

Term	Meaning
C-TMS	Transport Management System
C-WMS	Warehouse Management System
CR	Change Request
C-WCS	Warehouse Control System
C-ePOD	Electronic Proof of Delivery
C-MCS	Mobile Control System
C-TTM	Track and Trace Management
EDI	Electronic Data Interchange
TID	Testing Issue Development, or Log

1.2 TESTING PROCESS

1.2.1 TIDs AND RESOLUTION

If there are any areas of the functionality that are not acceptable or do not meet the requirement specified in the Change Request then these should be expressed by raising a TID.

1.2.2 FINAL 'END TO END' TESTING

Prior to release to a production database, a full 'End to End' test is required on the test system by all sites using the database. Once this is signed off, a release date can be arranged.

1.2.3 AUTHORISATION

Authorisation from nominated release personnel only will be required when requesting a release to a production environment

2 CHANGE REQUESTS

2.1 Customer Ref: Actuals

OBS Log Number:	359621
Summary of Call	Ensure all actuals are debriefed
Detail of Fix	Ensure all actual weights and volumes are populated before a trip can be set to COMPLETED
Set-up and Configuration	No set-up/configuration required

2.2 Customer Ref: Despatch

OBS Log Number:	362667
Summary of Call	Vehicle Despatch Report
Detail of Fix	Add depot to parameters
Set-up and Configuration	No set-up/configuration required

2.3 Customer Ref: WREQ0030580

OBS Log Number:	358425
Summary of Call	GSN: Create a new report
Detail of Fix	The new export Inventory Transactions will need authorisation for the appropriate user groups.
Set-up and Configuration	No set-up/configuration required

2.4 Customer Ref: WREQ0030824

OBS Log Number:	358506
Summary of Call	GSN: Modify ASN interface
Detail of Fix	Override collection location on ASN1 dependant on new WS_COLLECT_LOCATION parameter and partnership setting for store.
Set-up and Configuration	

Registry/Rules Settings		
Path & Name	Setting Value	Result
WS_COLLECT_LOCATION	9576	Collection location to override the supplier partnership at customer level

2.5 Customer Ref: WREQ0031664

OBS Log Number:	359252
Summary of Call	GSN: Retain FORECAST Value from ASN2
Detail of Fix	Set new forecast figures on ASN1 only and send to paragon in preference to planned.
Set-up and Configuration	

Registry/Rules Settings		
Path & Name	Setting Value	Result
PAR_EXPORT_FORECAST	Y	Send forecast rather than actual values to paragon

2.6 Customer Ref: WREQ0031943

OBS Log Number:	359656
Summary of Call	HAM - Microlise Interface
Detail of Fix	Changes to the Microlise interface
Set-up and Configuration	No set-up/configuration required

2.7 Customer Ref: WREQ0031943

OBS Log Number:	359660
Summary of Call	HAM - Changes to WMS Despatch (CITD)
Detail of Fix	The EDI processes for LOAD and CITD messages will need to have a new EDI parameter called OUTBASE_INDICATOR set to Y to enable the new functionality.

When the parameter is Y, the LOAD and CITD messages will be split by outbase for the same TMS trip to create separate WMS loads based on the outbase indicator.

Note that any orders that are not going to an outbase for a customer that is using the van fleet will not be included in a file for the outbase and these orders will be included in a file for the TMS trip itself without an

outbase indicator.

The customers and fixed routes will need to have the new 'Van Fleet' flag set to Y to enable the new functionality.

The outbases will be identified as RDC locations that exist with an 'OUTBASE_INDICATOR' decoded value for 'REFERENCE'.

This outbase indicator will be a single character to be included in the TMS trip to replace the first digit of the trip number (e.g. MAN-A0123456 instead of MAN-00123456).

This decoded value must exist to enable the new functionality.

No set-up/configuration required

Set-up and Configuration

2.8 Customer Ref: WREQ0031943

OBS Log Number:
Summary of Call

358670
HAM - Connected View Interfaces

New version 2.43 of TripOrder.xsd will need to be installed by for the EDI files for interfacing with ConnectedView.

The EDI processes for ConnectedView should exist with triggers, parameters and report processes without a location or a customer but for a cost centre.

ORD:

Flow Type: ORD_XML_OUT

Trigger STATUS: UNSCHEDULED

Parameters:

ALLOW_MULTI_CUSTOMER = Y INCLUDE_ORDER_STATUS = Y SEND_HEADER_UPDATES = Y
SEND_LINE_ITEMS = Y

The order message will be sent for the despatching source depot for the creation and amendment of the orders at the depot.

PACK:

Flow Type: ORD_XML_OUT

Parameters:

PACK_EVENT = Y SEND_LINE_ITEMS = Y

The pack message will be sent for the despatching source depot for the packing of the orders at the depot.

Detail of Fix

POCPOD:

Flow Type: TRIP_XML

Parameters:

ALLOW_MULTI_CUSTOMER = Y INCLUDE_ITEM_DELIVER = Y INCLUDE_NONCON_CODES = Y
INCLUDE_REASON_CODES = Y INCLUDE_REASON_TYPE = Y INCLUDE_SIGNATURE = Y
PODS_POCS = Y SEND_LINE_ITEMS = Y

The POC messages will be sent for the loading at the source location for the collection orders.

The POD messages will be sent for the unloading at the delivery location for the delivery orders.

This trip may be for a depot that may be an outbase for the van fleet.

The EDI processes also should exist for the LOAD, CITD and electronic manifest messages.

The load message will be sent for the despatching source depot.

The CITD message will be sent for the despatching source depot.

An electronic manifest message will be sent for the despatching delivery depot for the parcel carrier.

This depot may be an outbase for the van fleet.

These EDI parameters can be configured to match the mapping of the files by any external processing for transfer to the source systems for the orders and carriers.

New version 2.43 of TripOrder.xsd will be required for the messages for ConnectedView to be mapped.

This version contains the ORDER_STATUS element at the end of the ORDER_HEADER segment.

Set-up and Configuration

No set-up/configuration required

2.9 Customer Ref: WREQ0031943

OBS Log Number:

359661

Summary of Call

HAM - Item & Master Pallet Labels

The new package label format will be available for configuration

The new pallet label format will be available for configuration.

The pallet label printing will be to a laser printer for a PDF document or to a label printer for a Zebra label format.

Detail of Fix

The new MCS_PALLET_LABEL_FORMAT system parameter will be used to store the Zebra pallet label format.

If this system parameter is not specified, the existing PDF pallet label format will be used.

The supporting information of the new package label will need to be implemented for the carrier tracking and routing.

Set-up and Configuration

No set-up/configuration required

2.10 Customer Ref: WREQ0031943

OBS Log Number:	359663
Summary of Call	HAM - Create Items when order packed Order items will be created for the tracking references when the carrier labels are printed for the van fleet routes. These order items will be made available as trip items for scanning using MCS in the active depots.
Detail of Fix	The deletion of tracking references will delete the corresponding order items when the order is unpacked, repacked or unscheduled without retaining pack data. The corresponding trip items will also be deleted when the order items are deleted. Any trip items that have been palletised or added to AWB/Consignments in the depots will be removed from the pallets and AWB/Consignments.
Set-up and Configuration	No set-up/configuration required

2.11 Customer Ref: WREQ0031943

OBS Log Number:	359664
Summary of Call	HAM - Scheduling Engine
Detail of Fix	Changes to the Scheduling Engine and Paragon
Set-up and Configuration	No set-up/configuration required

2.12 Customer Ref: WREQ0031943

OBS Log Number:	359667
Summary of Call	HAM - MCS Control Parameters
Detail of Fix	Changed the location screen to display the mcs parameters in a new tab.
Set-up and Configuration	No set-up/configuration required

2.13 Customer Ref: WREQ0031943

OBS Log Number:	359668
Summary of Call	HAM - Trip Barcode on Reports
Detail of Fix	The HC Shunt Sheet, HC Trip Sheet and HCR Loading Sheet reports will include a barcode for the TRIP ID in format 39 for scanning using MCS.
Set-up and Configuration	No set-up/configuration required

2.14 Customer Ref: WREQ0031943

OBS Log Number:	359670
Summary of Call	HAM - MCS General Changes
Detail of Fix	Read system params into MCS and hide AWB number.
Set-up and Configuration	No set-up/configuration required

2.15 Customer Ref: WREQ0031943

OBS Log Number:	359671
Summary of Call	HAM - MCS Project specific changes
Detail of Fix	Pallet Building and Pallet Closure changes.
Set-up and Configuration	No set-up/configuration required

2.16 Customer Ref: WREQ0031943

OBS Log Number:	359674
Summary of Call	HAM - MCS Trans-Ship
Detail of Fix	Added Trans Ship functionality for MCS.
Set-up and Configuration	No set-up/configuration required

2.17 Customer Ref: WREQ0031943

OBS Log Number:	362625
Summary of Call	HAM - Item & Master Pallet Label 2
Detail of Fix	Amended the reprinting of the label format.

The Service Type will display the carrier service level or the order service level to ensure that a service is displayed depending on the type of routing that has been performed to schedule the order.
No set-up/configuration required

Set-up and Configuration

2.18 Customer Ref: Inventory Transactions

OBS Log Number:	364431
Summary of Call	Inventory Transactions Store Scan Change
Detail of Fix	The StoreScan section included extra columns as per the other scan sections. The depot and user columns have been removed from the extract.
Set-up and Configuration	No set-up/configuration required

2.19 Customer Ref: PO 44010884813

OBS Log Number:	362811
Summary of Call	Webservice Label Change
Detail of Fix	Changes to Labels
Set-up and Configuration	No set-up/configuration required

3 SUPPORT INCIDENTS

3.1 Customer Ref: 360403

OBS Log Number:	360403
Summary of Call	VDA4933 and VDA4933 additional matches
Detail of Fix	When a 4987 matches to more than one 4933 on the same delivery stop, replace the orders on the trip
Set-up and Configuration	No set-up/configuration required

3.2 Customer Ref: LOTS

OBS Log Number:	360459
Summary of Call	Send address to LOTS in ORD event
Detail of Fix	Change to allow address details and contacts to be sent to LOTS
Set-up and Configuration	No set-up/configuration required

3.3 Customer Ref: Reason Code

OBS Log Number:	361188
Summary of Call	Cancelled Item - Reason Code
Detail of Fix	Only create SD reason codes for all items on an order when no items sent and none returned.
Set-up and Configuration	No set-up/configuration required

3.4 Customer Ref: Encrypted sources

OBS Log Number:	361652
Summary of Call	Release PL_VERSION
Detail of Fix	Release package to assist with version control checks.
Set-up and Configuration	No set-up/configuration required

3.5 Customer Ref: 362482

OBS Log Number:	362482
Summary of Call	Email Information - populated fields
Detail of Fix	Amendment to XML outbound generation so contact details not based on comments being null but on email address being populated.
Set-up and Configuration	No set-up/configuration required

3.6 Customer Ref: Performance Improvements

OBS Log Number:	362723
Summary of Call	Performance Improvements
Detail of Fix	Reduced the number of times that the standard journeys are assessed for the 'from' location of the orders when calculating payments.
Set-up and Configuration	No set-up/configuration required

3.7 Customer Ref: Invoice Format

OBS Log Number:	363373
Summary of Call	Incorrect Invoice format
Detail of Fix	Changes to the BL numbers and the frequency reported- no longer at order level but at gate level within the shipment and invoice
Set-up and Configuration	No set-up/configuration required

3.8 Customer Ref: INC30189216

OBS Log Number:	363421
Summary of Call	File has order header but no details
Detail of Fix	When determining if an order is to be included in Zetes file extend test for 'SL' reason code items to exclude the 'X' items that have been split off
Set-up and Configuration	No set-up/configuration required

3.9 Customer Ref: INC30418115

OBS Log Number:	364473
Summary of Call	Report showing wrong data
Detail of Fix	Amendment to ITEM_MOVEMENTS_EXTRACT_2 to correct to population of POD confirmed date (column T) on so uses scan date
Set-up and Configuration	No set-up/configuration required

3.10 Customer Ref: Decode Amendment

OBS Log Number:	364696
Summary of Call	Change decode names
Detail of Fix	Amendment to shipment extract to use Parts decode where appropriate
Set-up and Configuration	No set-up/configuration required

3.11 Customer Ref: Scheduling Engine

OBS Log Number:	359457
Summary of Call	Scheduling Engine Single Network
Detail of Fix	Ensure when roll back performed inside of loop that it is not then also performed outside of the loop.
Set-up and Configuration	No set-up/configuration required

3.12 Customer Ref: Portal

OBS Log Number:	359518
Summary of Call	Portal not reporting shortages
Detail of Fix	Changed EPOD interface to ensure quantity set before reason added and also ensure order details sent to LOTS on delivery message.
Set-up and Configuration	No set-up/configuration required

3.13 Customer Ref: Empties Changes

OBS Log Number:	362440
Summary of Call	Rqmts change for Credit acc on empties
Detail of Fix	Changes to the finance functionality based on the Empties not providing the references we expected
Set-up and Configuration	No set-up/configuration required

3.14 Customer Ref: Split Order scanning

OBS Log Number:	362828
Summary of Call	Split order scanning delivery trips
Detail of Fix	Change to split scanning, to prevent orders being planned on empty stops
Set-up and Configuration	No set-up/configuration required

3.15 Customer Ref: Support

OBS Log Number:	364191
Summary of Call	Debrief issue
Detail of Fix	Changes to the shipment extract and removal of validate order when rating a completed trip
Set-up and Configuration	No set-up/configuration required

3.16 Customer Ref: Trunk Scripts Main

OBS Log Number:	364910
Summary of Call	Trunk Scripts added into main stream
Detail of Fix	Trunk scripts for Paragon added into main code stream
Set-up and Configuration	No set-up/configuration required

3.17 Customer Ref: Collection dates/times

OBS Log Number:	365051
Summary of Call	Validate order collection dates/times

The just in time orders will only have their collection date/time windows assessed when the order status is INVALID, VALID or UNSCHEDULED.

Detail of Fix

A user context will be set when validating the just in time orders for the cost centre of the order unless the calling process has already done so (e.g. Paragon planning).

Set-up and Configuration

No set-up/configuration required

3.18 Customer Ref: Packaging and Service

OBS Log Number:

359779

Summary of Call

Current packaging and Service charge ext

Report type OWN_CHRGs already in Oracle reporting suite for the packaging charges. Options added to ORS for

Detail of Fix

1) Service Capture (SRVCS_CAPT)

2) Services including sliding charges (ACC_SRVCS)

3) Accounts (ACC_ACCOUNT).

Set-up and Configuration

No set-up/configuration required

3.19 Customer Ref: 361243

OBS Log Number:

361243

Summary of Call

Export the cost per route

Detail of Fix

Add the fields for business data 'Fixed costs by route' to extract suite under type RTE_COSTS.

Set-up and Configuration

No set-up/configuration required

4 TID CHANGES

4.1 OBS Log Number: 361291

Customer Ref:	Invoice Formats
Summary of Call	Amend Invoice report and extract
Detail of Fix	Changes to the invoice report to include invoice number and Rating to update the order revenue total
Set-up and Configuration	No set-up/configuration required

4.2 OBS Log Number: 362508

Customer Ref:	INC29954448 - Main
Summary of Call	Interface from CTMS to ZETES are failing
Detail of Fix	Fixes for OUT2 and CSV. You will need to switch on 'SEND_PALLET_ID_XML' parameter if required in XML.
Set-up and Configuration	

Registry/Rules Settings		
Path & Name	Setting Value	Result
SEND_PALLET_ID_XML	'N'	Send the pallet ID tag in the XML flows

4.3 OBS Log Number: 365003

Customer Ref:	Remove sum from sql
Summary of Call	Remove sum
Detail of Fix	Amend the shipment cursor to remove Sum from invoice amount
Set-up and Configuration	No set-up/configuration required

4.4 OBS Log Number: 360756

Customer Ref:	Invoicing
Summary of Call	Testing - Invoicing
Detail of Fix	Changes to the outbound Interface file format.
Set-up and Configuration	No set-up/configuration required

4.5 OBS Log Number: 352903

Customer Ref:	No Ref
Summary of Call	Carrier manifest reports
Detail of Fix	Added new parameter into Function call on reports to allow reports to run
Set-up and Configuration	No set-up/configuration required

4.6 OBS Log Number: 360150

Customer Ref:	No Ref
Summary of Call	Paragon Import fails
Detail of Fix	Fix issue with trunk flag on directs from paragon.
Set-up and Configuration	No set-up/configuration required

4.7 OBS Log Number: 361329

Customer Ref:	P34 - 1.3 & 5.5
Summary of Call	Patch Test - P34 - Manual Orders
Detail of Fix	Ensure line data block cleared based on correct product type.
Set-up and Configuration	No set-up/configuration required

4.8 OBS Log Number: 363499

Customer Ref:	Validate order sched
Summary of Call	Validate order before scheduling van
Detail of Fix	Include a validate order at the start of the scheduling engine for van fleet
Set-up and Configuration	No set-up/configuration required

4.9 OBS Log Number: 363681

Customer Ref:	No Ref
Summary of Call	Orders not being packed via CIPD in CTMS The trip for the delivery of the order will be found for the printing of the carrier labels via CIPD files.
Detail of Fix	Any shunt and trunk trips will not be used to assess the label format for the carrier.
Set-up and Configuration	No set-up/configuration required

4.10 OBS Log Number: 363801

Customer Ref:	Just In Time Orders
Summary of Call	Just In Time orders set available date
Detail of Fix	Changes to prevent available date from being set until the order has been validated
Set-up and Configuration	No set-up/configuration required

4.11 OBS Log Number: 363855

Customer Ref:	EDI Amendments
Summary of Call	HAM - Amendments to EDI files for CV 1. The EVENT_TYPE for trip files will be TRP unless the file is for POC or POD for Connected View interfaces. Then the event type will be POC or POD as required.
Detail of Fix	2. Microlise - New system Parameter MIC_SHIPMENT_SO_REF to control if the external_ref is included in the shipment details tag
Set-up and Configuration	No set-up/configuration required

4.12 OBS Log Number: 363974

Customer Ref:	Invoicing
Summary of Call	Main release of branch 362111
Detail of Fix	Changes to Invoicing to select customers who have outstanding payments
Set-up and Configuration	No set-up/configuration required

4.13 OBS Log Number: 364523

Customer Ref:	Paragon
Summary of Call	HAM - Filters on Paragon Export
Detail of Fix	Changes to the Paragon expotr to segregate Van fleet from other fleets
Set-up and Configuration	No set-up/configuration required

4.14 OBS Log Number: 364556

Customer Ref:	Paragon
Summary of Call	HAM - Fix to NEW trips from Paragon expt
Detail of Fix	Changes to the export code to update NEW trips
Set-up and Configuration	No set-up/configuration required

5 OBSL PRODUCT DEVELOPMENT

5.1 OBS Log Number: 363082

Summary of Call Performance improvements to finance
Detail of Fix Improvements to performance times based on 2 new parameters ACC_SUPPRESS_RATING and ACC_KNOWN_ZONE

Set-up and Configuration

Registry/Rules Settings		
Path & Name	Setting Value	Result
ACC_SUPPRESS_RATING	Y	Stops orders from rating
ACC_KNOWN_ZONE	Y	Pass in a zone format COUNTRY CODE and POSTAL REGION

5.2 OBS Log Number: 363185

Summary of Call Incompatibility with invoice and Reports
Detail of Fix Amended parameter to display shipment file
Set-up and Configuration No set-up/configuration required

5.3 OBS Log Number: 359601

Summary of Call Context for PARINT / webservices 359072
Detail of Fix New clear context to be called at start of web service just in case a previous call has set a context in the session that is not applicable to the new order.
Set-up and Configuration Session remains after web service call end and is re-connected too by later web service calls.
 No set-up/configuration required

5.4 OBS Log Number: 362654

Summary of Call Fix MCS Site view
Detail of Fix Fix to mcs sites script.
Set-up and Configuration No set-up/configuration required

7 ADDITIONAL CHANGES

7.1 WCS

There are no WCS changes required.

7.2 EPOD/T2A

There are no EPOD changes required.

7.3 MCS

An MCS change is required for the following logs:

- 359670
- 359674
- 359671

Note: MCS Patch Version 2.00.03.002 to be installed

7.4 PORTAL/TTM

A Portal change is required for the following logs:

- 362811

Note: Patch version 8.01.065 (Manifest Label changes) to be installed

7.5 EDI

An EDI change is required for the following logs:

- 358670

Note: A new version 2.43 of TripOrder.xsd will need to be installed for the EDI files for messages for the new ConnectedView interface.
