1 SUMMARY INTRODUCTION

1.1 INTRODUCTION

The main aim of this document is to provide *CALIDUS* TMS users with the level of detail required to accurately test all software included in the patch. The document also contains set-up and configuration details to enable the user to configure the system correctly for the new functionality to work.

1.1.1 GLOSSARY OF TERMS

Term	Meaning
C-TMS	Transport Management System
C-WMS	Warehouse Management System
CR	Change Request
C-WCS	Warehouse Control System
C-ePOD	Electronic Proof of Delivery
C-MCS	Mobile Control System
C-TTM	Track and Trace Management
EDI	Electronic Data Interchange
TID	Testing Issue Development, or Log

1.2 TESTING PROCESS

1.2.1 TIDs AND RESOLUTION

If there are any areas of the functionality that are not acceptable or do not meet the requirement specified in the Change Request then these should be expressed by raising a TID.

1.2.2 FINAL 'END TO END' TESTING

Prior to release to a production database, a full 'End to End' test is required on the test system by all sites using the database. Once this is signed off, a release date can be arranged.

1.2.3 AUTHORISATION

Authorisation from nominated release personnel only will be required when requesting a release to a production environment

2 DEVELOPMENT

2.1 Log Number: 00478672

Summary of Call

REF: 19874 - 3PL Scheduling Engine failing with a null stop number

1. Any depot that is listed in the system parameter 'AUTO_SCHED_INACTIVE_DEPOTS' will not be processing its orders in the 3PL scheduling engine. These orders will be marked for manual scheduling and they will have an audit message 'The depot is inactive for scheduling, order cannot be scheduled'.

Detail of Fix

2. If a drop number cannot be derived for the location for the route, then an order for that location will not be scheduled. A default drop number cannot be applied for the position of the trip stop. These orders will be marked for manual scheduling and they will have an audit message 'Cannot pre-plan no drop number available'.

Set-up and Configuration

No set-up/configuration required

2.2 Log Number: 00480177

Summary of Call

REF: 19538 - API orders timing out and taking too long to process

Detail of Fix

An index has been added to the order import process for the customer reference.

Set-up and Configuration

No set-up/configuration required

2.3 Log Number: 02595605

Summary of Call

Tractor Information for BI

Detail of Fix

Scripts prepared for MIS_EXTRACT data to include RES_TRACTOR

Set-up and Configuration

No set-up/configuration required

2.4 Log Number: 00474273

Summary of Call

REF: 19873 - Failures in STP API orders and 3PL scheduling

The orders are assigned by the 3PL scheduling engine to trip stops based on their activity at those stops.

The orders will be loaded or unloaded at a stop.

Detail of Fix

DP_CTMS_IMPORT is modified the error message where it said DEP/DEL address cannot be NULL when ext_ref is not found be reported with a better message. Corrected the logic which caused unique constraint violated error.

Set-up and Configuration

The API for the orders will prevent an attempt to create duplicate locations.

No set-up/configuration required

2.5 Log Number: 00464750

Summary of Call

SCR 05: Show vehicle and technician

Detail of Fix

Display driver name in CTL

Set-up and Configuration

No set-up/configuration required

2.6 Log Number: 00464795

Summary of Call

SCR 44: Job Ticket to display a free-text field to add to service report to add "Actual Customer"

Detail of Fix

Development to display the 'Actual Customer' in CTL and on the epod pod note.

Set-up and Configuration

No set-up/configuration required

2.7 Log Number: 02592042

Summary of Call

SCR 13: Add Default Vehicle to Driver

A new column is added to RES_PERSON to store Default vehicle ID.

Detail of Fix

The CTMS system is modified to allow the technicians to have a default vehicle.

The CTL Call Logging screen will use this information to default the vehicle for the driver, if that driver has no current trip.

Set-up and Configuration

No set-up/configuration required

2.8 Log Number: 00479896

Summary of Call
Detail of Fix
Set-up and Configuration

SCR 21: Top-Up Transfers
 Development for Top-up transfers. Allows the creation of Top-up transfer orders.
 No set-up/configuration required

2.9 Log Number: 00477098

Summary of Call
Detail of Fix
Set-up and Configuration

Generate Warehouse Charges from Contracts
 The 'WAREHOUSE' non-standard tariffs will depend on a condition of 'MANUAL' or 'MONTHLY FEE'.
 A 'MANUAL' condition means that the charge will apply only in the 'Warehouse' screen. A 'MONTHLY FEE' condition means that the charge will apply only in the monthly generation of the charges.
 No set-up/configuration required

2.10 Log Number: 00487971

Summary of Call
Detail of Fix
Set-up and Configuration

Ref: 20145 - Mismatches in Waterfall Screen
 The orders on the TMP trips for the routes that are being planned by the Paragon API for version STP will be reset to UNSCHEDULED status before they are replanned or not planned.
 No set-up/configuration required

2.11 Log Number: 00467382

Summary of Call
Detail of Fix
Set-up and Configuration

SCR 20: New Vehicle - don't specify type
 CTMS will create the vehicle axles and tyres when the job is completed and create the inspections based on the callout.
 No set-up/configuration required

2.12 Log Number: 00469939

Summary of Call
Detail of Fix
Set-up and Configuration

SCR 16: Allow searching for local tyres when offline.
 The CTMS part master data will be updated whenever the parts are selected or used in CTMS and EPOD.
 No set-up/configuration required

2.13 Log Number: 00479895

Summary of Call
Detail of Fix
Set-up and Configuration

SCR 17: Add Vehicle ODO details to send to Elucid
 This change will change the way that the CTL books jobs for adding taking stock to a technician whilst on a job.
 Link with SCR-17 & 28
 No set-up/configuration required

2.14 Log Number: 00479887

Summary of Call
Detail of Fix
Set-up and Configuration

SCR: 28 Vehicles Unique per Customer
 This change will change the way that customer vehicle data is stored. This will now be by customer.
 Link this with SCR-17 - 479895 and SCR-21 - 479896 and SCR- 20 - 467382 and SCR- 16 - 469939
 No set-up/configuration required

2.15 Log Number: 00479899

Summary of Call
Detail of Fix
Set-up and Configuration

SCR: 35 Services Supplied at Job Level
 This change will change the way that CTMS stores and generates services supplied.
 Currently, the EPOD device has been configured to prompt for some services supplied at a vehicle level, as opposed to at the tyre position level (i.e. Installation or Other Work). CTMS will recognise this and add the services supplied from vehicle-level entries.
 No set-up/configuration required

2.16 Log Number: 00484535

Summary of Call	EDI Parameter PREVENT_RESEND_ORDER
Detail of Fix	EDI parameter used to prevent rebooked order being sent if the original order has already been sent
Set-up and Configuration	No set-up/configuration required

2.17 Log Number: 00491708

Summary of Call	Release task to for SCR-28 and 17
Detail of Fix	Amendments to SCR 17 & 28
Set-up and Configuration	No set-up/configuration required

2.18 Log Number: 00479894

Summary of Call	SCR:42 Outside Stores/Depot Hubs to be used
Detail of Fix	This change will change the CTL Call Logging screen to identify the start of the technician's trip based on their own defined hub location, and to identify the pickup location of the order based on the product selected.
Set-up and Configuration	No set-up/configuration required

2.19 Log Number: 00479897

Summary of Call	SCR: 29 Enter Van Stock
Detail of Fix	Change to add new Item types for Van Stock, Fit Other and Services only etc.
Set-up and Configuration	No set-up/configuration required

2.20 Log Number: 00493457

Summary of Call	Release task for additional changes to SCR 28
Detail of Fix	Created for re-release of SCR-28 for the issue reported of missing location in RTC which needs a fix in DP_CUST_SERV.pck and DP_EPOD_WEB_SERVICE to update the current_location_id on RTC
Set-up and Configuration	No set-up/configuration required

2.21 Log Number: 02665941

Summary of Call	Set system parameter CFX_CARRIER so it can be configured at a cost centre level
Detail of Fix	CFX_CARRIER is changed to make it configurable by CARRIER instead of SYSTEM. The programs using the parameter are also changed accordingly.
Set-up and Configuration	User can configure CARRIER level data instead of SYSTEM level. No set-up/configuration required

2.22 Log Number: 00499175

Summary of Call	CTL Top-up transfers
Detail of Fix	Release views for ctl Top-up transfers
Set-up and Configuration	No set-up/configuration required

2.23 Log Number: 00498787

Summary of Call	Amendment to TYRE_INSP for SCR-28
Detail of Fix	The ORS type TYRE_INSP has been amended to join the tractor specifically to the tractor for the customer of the order at all levels of the report.
Set-up and Configuration	No set-up/configuration required

2.24 Log Number: 00467514

Summary of Call	Report required in ORS for trips. Need to be able to stipulate start location and end location.
Detail of Fix	New ORS type has been created called 'TRIP_LOCS' which has 5 columns SCHED_NAME - Range - Required TRIP_ID

LOAD_LOC - Value - Required

UNLOAD_LOC - Value - Required

ROUTE_CODE

This ORS will give data about all the trips that went between 2 locations.

User Notes :In order to get unique records, user can use the sort and group_by tick box in the screen. As Load and Unload locations are the selection criteria they can be discarded from the report by not including them, it can be done by unticking the Inc tick box.

Set-up and Configuration

No set-up/configuration required

2.25 Log Number: 00504598

Summary of Call

SCR29 Fix for 479897

Detail of Fix

Fix to send ePod collections correctly.

Set-up and Configuration

No set-up/configuration required

2.26 Log Number: 00497703

Summary of Call

Release for DEV-20 for 02592042

Detail of Fix

CTMS will create the vehicle axles and tyres when the job is completed and create the inspections based on the callout.

The CTMS part master data will be updated whenever the parts are selected or used in CTMS and EPOD. EDI Jobs creation is needed for the triggers.

Set-up and Configuration

No set-up/configuration required

2.27 Log Number: 00495690

Summary of Call

WREQ0087544: Finance File Interfaced to Oracle v1.00

Detail of Fix

Program change, new fields added to extract

Set-up and Configuration

No set-up/configuration required

2.28 Log Number: 00512651

Summary of Call

The Paragon ID is not updated for the locations via the API

Detail of Fix

New EDI parameter called UPDATE_PARAGON_ID is created for API process when set to Y will update the Pargon_ID for geo_location as per the creation of new location.

Set-up and Configuration

No set-up/configuration required

2.29 Log Number: 00510378

Summary of Call

Add all the preferences at the order level to the Trip Waterfall screen

Detail of Fix

The preferences in order level is made available for configuration. 10 order status are added to PREFERENCE_STATUS table if not already present before.

Set-up and Configuration

No set-up/configuration required

2.30 Log Number: 00515979

Summary of Call

Ref: 20978: Paragon inactive depots

Detail of Fix

The ORD and LOC records will not be sent to Paragon when they are for an inactive depot.

Set-up and Configuration

No set-up/configuration required

2.31 Log Number: 00481577

Summary of Call

Management of the Hub Locations and the Empty Trip Stops

Detail of Fix

New functionality added to prevent the deletion of empty stops and depot locations

Set-up and Configuration

No set-up/configuration required

2.32 Log Number: 00517175

Summary of Call

INT_XML_CONTROL

Detail of Fix	Add new index to table
Set-up and Configuration	No set-up/configuration required

2.33 Log Number: 00515770

Summary of Call	Audit customers in import
Detail of Fix	The customer and order import processes via the API will include a message in the audit log when a process starts and when some data has been extracted.
Set-up and Configuration	No set-up/configuration required

2.34 Log Number: 00516754

Summary of Call	Update the PARAGON_ID for the main location for a customer The 'PARAGON_ID' for the location can be set when the customer itself is updated without any address information being provided via the customer API.
Detail of Fix	This functionality requires the EDI parameter 'UPDATE_PARAGON_ID' to be set to 'Y' for the 'API' process.
Set-up and Configuration	No set-up/configuration required

2.35 Log Number: 00507384

Summary of Call	Provide authorisation for the required field for the ORS Removed the existing Req All and Req None buttons. Created a new function called 'Ors_Edit_Req_field' which can be made accessible by user groups to enable the user to edit the 'Req' field. When an authorized user tries to edit the 'Req' field then a warning will appear to the unauthorised user of the possible consequences and advise the user to confirm the amendment of report with the system manager.
Detail of Fix	
Set-up and Configuration	No set-up/configuration required

2.36 Log Number: 00517964

Summary of Call	Paragon API updates
Detail of Fix	The tractor will be updated for an existing trip without restriction based on the end time of the shift.
Set-up and Configuration	No set-up/configuration required

2.37 Log Number: 00517796

Summary of Call	Include decode STOP_TYPE in Trip Waterfall The decoded values of 'STOP_TYPE' will be used in the Trip Waterfall screen to replace the codes for the stop types with descriptions, for example, 'Start Up' for 'SU'.
Detail of Fix	The codes will be used by default when the decoded values do not exist.
Set-up and Configuration	No set-up/configuration required

2.38 Log Number: 00518000

Summary of Call	Amend Trip Locations in Trip Waterfall Trip Locations in waterfall is amended to use Location when stop is RDC or town when others.
Detail of Fix	Stop Type is removed from Trip Locations as its already present in Trip Stops.
Set-up and Configuration	No set-up/configuration required

2.39 Log Number: 00516565

Summary of Call	Post Trigger error in Planning
Detail of Fix	Delivery_type_id is updated to length 35 in Orders and Planning screen to avoid the POST-QUERY trigger error.
Set-up and Configuration	No set-up/configuration required

2.40 Log Number: 00492872

Summary of Call	Development for Supporting Documentation
Detail of Fix	New columns for consumer and carton packaging are added for the Supporting Documentation for the invoicing.

These documents will include the new columns:

Added the 'Pick Qty' to these formats and the export file:

Cargowise Detail SD1

Cargowise Detail SD2

Cargowise Detail SD3

Cargowise Detail SD5

Cargowise Detail SD6

Payment Details

Added the 'Consumable Charges' to these formats and the export file:

Cargowise Detail SD1

Cargowise Detail SD2

Cargowise Detail SD6

Payment Details

No set-up/configuration required

Set-up and Configuration

2.41 Log Number: 00346696**Summary of Call**

Inspection Required Issue

Detail of Fix

Updated f_last_inspection function to set a default date when it is NULL.

Set-up and Configuration

No set-up/configuration required

2.42 Log Number: 00521650**Summary of Call**

Additional changes for 492872 - Development for Supporting Documentation

Detail of Fix

PAYMENT_DTLS export type has been modified to display SCREENING Charge as last column with corresponding value which was missing in previous version.

Set-up and Configuration

No set-up/configuration required

2.43 Log Number: 00516019**Summary of Call**

Update Paragon keys

Detail of Fix

Keys updated with correct dates and master key values

Set-up and Configuration

No set-up/configuration required

2.44 Log Number: 00501535**Summary of Call**

Include auditing for Paragon API

Detail of Fix

Added auditing to packages to know what's been sent to paragon through API and also when the RUN_NUMBER is changed.

Set-up and Configuration

No set-up/configuration required

2.45 Log Number: 00488390**Summary of Call**

Rating-Invoicing Requirements

Invoice Screen:

Refreshes the data for the Adhocs tick box.

Warehouse Screen:

Commits the changes when the New button is pressed like the Save button for the ad-hoc services. Uses the condition of MANUAL for Warehouse charges. Accounts for multiple valid non-standard tariffs by condition.

Customers Screen:

Detail of Fix

Introduces Consumable Service Charges and Carton Service Charges for the customer.

Contracts Screen:

Adds SERVICE conditions for CONSUMPAK and CTNPAK. Charges and payments will use these conditions when the Consumable Service Charges and Carton Service Charges are active for the customer.

Rating Process:

Sets the status of the payments to A not F. Retains ORD_LINE payments not PICK_PACK for the PICKPACK tariff. Activates the system parameter ACC_CONTRACT_SERVICES for the SERVICES tariff for the CONSUMPAK and CTNPAK payments.

Set-up and Configuration

No set-up/configuration required

3 SUPPORT INCIDENTS

3.1 Log Number: 00470712

Summary of Call	Invoice Generation for Parties
Detail of Fix	Invoices can be created for payments that have been created for orders for customers for rating parties.
Set-up and Configuration	No set-up/configuration required

3.2 Log Number: 02588754

Summary of Call	Trip Tree Data Loading
Detail of Fix	The PLANNING screen has been modified to include the user's time zone instead of the default system date
Set-up and Configuration	No set-up/configuration required

3.3 Log Number: 00464118

Summary of Call	TI Order Import - Validate Date Formats
Detail of Fix	The package is modified. So, when an invalid date format is imported, it's been reported with a valid error message.
Set-up and Configuration	No set-up/configuration required

3.4 Log Number: 02660730

Summary of Call	Unable to set order back to planned
Detail of Fix	Trip header update for external cost value
Set-up and Configuration	No set-up/configuration required

3.5 Log Number: 02595529

Summary of Call	Routes pulling through to AX as Manual carriers and open not 'firm-planned'
Detail of Fix	Routes pulling through to AX as Manual carriers and open not 'firm-planned' HAULIER fields > 6 and last 3 are a depot code then trim so passes 6 char code to AX.
Set-up and Configuration	No set-up/configuration required

3.6 Log Number: 00340478

Summary of Call	Include a locking strategy and error handling in the Paragon import API process
Detail of Fix	Added locking to the paragon packages to allow records to be skipped if locked.
Set-up and Configuration	No set-up/configuration required

3.7 Log Number: 00375203

Summary of Call	Main version for Webfleet
Detail of Fix	Main version 1.45 of the TomTom/Webfleet process for the branched version 1.37.1.4.
Set-up and Configuration	No set-up/configuration required

4 BUGS

4.1 Log Number: 02657296

Summary of Call

Detail of Fix

Set-up and Configuration

Unable to copy tariff

Change is made to Contract's copy functions to display the currency dropdown to enable copying.

No set-up/configuration required

4.2 Log Number: 00481350

Summary of Call

Detail of Fix

Set-up and Configuration

Encountered error in planning, missing Unload activities (no cl and no date/times)

Various changes to set the stop IDs and the stop numbers, to account for missing SU and empty stops.

Control records will be created for 'PAR_API' when the order is scheduled to 'DSK' or 'PCL' trips.

No set-up/configuration required

4.3 Log Number: 00482360

Summary of Call

Detail of Fix

Set-up and Configuration

Ref: 19909: Invalid orders sent from TMS to Paragon

Any new order lines should trigger an update to the Paragon API when the order is UNSCHEDULED not INVALID.

No set-up/configuration required

4.4 Log Number: 00490822

Summary of Call

Detail of Fix

Set-up and Configuration

3PL trips not rating

Improve efficiency of rating for 3PL carriers

No set-up/configuration required

4.5 Log Number: 00484500

Summary of Call

Detail of Fix

Set-up and Configuration

Fixed Route Template

All fields added to the Import

No set-up/configuration required

4.6 Log Number: 02680480

Summary of Call

Detail of Fix

Set-up and Configuration

CTMS- On time items (Assets) report is displaying 'DG' exception code incorrectly

The 'On Time Items', 'On Time Items (Assets)' and 'On Time Returns' exports have been changed because they include the reason code for the item itself.

The 'On Time Arrivals' and 'On Time Drops' exports have not been changed because they include a reason code for an item for the order.

The selected item may not have one of the reason codes that are included for the order itself.

No set-up/configuration required

4.7 Log Number: 00496683

Summary of Call

Detail of Fix

Set-up and Configuration

Set system parameter CFX_CARRIER so it can be configured at a carrier level

CFX_CARRIER is changed to make it configurable by CARRIER instead of SYSTEM, The programs using the parameter are also changed accordingly.

User can configure CARRIER level data instead of SYSTEM.

No set-up/configuration required

4.8 Log Number: 00495952

Summary of Call

Detail of Fix

Set-up and Configuration

Payment Type Testing

The 'CTNPAK' and 'CONSUMPAK' charge conditions can be assessed independently of each other for the 'SERVICE' tariff.

'Consignee' is included as the column heading on the extract for Cargowise.

No set-up/configuration required

4.9 Log Number: 00495483

Summary of Call	Unschedule orders for new run numbers for STS
Detail of Fix	Change is made so that the orders should be unscheduled from the trips for the route when the run number is readvised, and scheduled back to another trip or create new when scheduling engine is running.
Set-up and Configuration	No set-up/configuration required

4.10 Log Number: 00498233

Summary of Call	Testing issues
Detail of Fix	Correction to the following ORS reports HAULIER, INTERFACE, CARR_ALLOC and ORD_STATS.
Set-up and Configuration	No set-up/configuration required

4.11 Log Number: 00481913

Summary of Call	Paragon - Run Keys
Detail of Fix	New process added to procedure to allow the keys to be manually updated
Set-up and Configuration	No set-up/configuration required

4.12 Log Number: 00305414

Summary of Call	Cancellation emails not showing in message monitoring
Detail of Fix	The database script will remove the constraint and replace it as a normal index.
Set-up and Configuration	To resolve issue with cancellation emails not showing in the message monitoring No set-up/configuration required

4.13 Log Number: 00499449

Summary of Call	Autorefresh in TMS not working
Detail of Fix	Some logic has been added to Waterfall screen to make it more dynamic when Auto refresh functionality has been made enabled for the user group.
Set-up and Configuration	No set-up/configuration required

4.14 Log Number: 00505522

Summary of Call	Drop the constraint for the audit messages
Detail of Fix	The constraint by created date and time that exists for the audit messages will be removed.
Set-up and Configuration	No set-up/configuration required

4.15 Log Number: 00505975

Summary of Call	Missing drop numbers
Detail of Fix	The locations for the routes will be uploaded from Paragon.
Set-up and Configuration	No set-up/configuration required

4.16 Log Number: 00506725

Summary of Call	SCR29 Issues.
Detail of Fix	Fixed CTMS package to set line/item qtys differently. Retrieve product description when using default products.
Set-up and Configuration	No set-up/configuration required

4.17 Log Number: 00508400

Summary of Call	Add new vehicle failure for Fleet Inspection
Detail of Fix	Fixed the issue of the addition of new vehicles to the fleet inspections.
Set-up and Configuration	No set-up/configuration required

4.18 Log Number: 00469910

Summary of Call	Webfleet Integration
Detail of Fix	Various fixes for the TomTom interface.
Set-up and Configuration	No set-up/configuration required

4.19 Log Number: 00505586

Summary of Call	Actual times being overwritten
Detail of Fix	Only populate actual time if not currently set in the TomTom interface
Set-up and Configuration	No set-up/configuration required

4.20 Log Number: 00510701

Summary of Call	EDI Failure Notification
Detail of Fix	Changes made to in_xml_in package to build the location id using an alpha/numeric suffix.
Set-up and Configuration	No set-up/configuration required

4.21 Log Number: 00512122

Summary of Call	Fix for SCR - 29
Detail of Fix	The CTMS package is fixed to mitigate the change in work type and prevent collection jobs from being sent to ePod when the store location and job's destination location match.
Set-up and Configuration	No set-up/configuration required

4.22 Log Number: 00512100

Summary of Call	Validation error
	The problem relates to the lat-long calculation failing for an address in Jersey.
Detail of Fix	The country code was GB not the required JE. Once the country code had been amended, the lat-long could be calculated.
Set-up and Configuration	No set-up/configuration required

4.23 Log Number: 00510599

Summary of Call	Duplicate unload records in trip PAR-00013894
Detail of Fix	Prevents the order being added to the trip multiple times by the STP Paragon API.
Set-up and Configuration	No set-up/configuration required

4.24 Log Number: 00512119

Summary of Call	Unschedule orders for new delivery date A new EDI parameter called 'UNSCHED_NEW_DATE' has been introduced for the 'API' process to import the order.
Detail of Fix	When it is set to 'Y', the order will be unscheduled from any incomplete trips when the order has a new schedule.
Set-up and Configuration	It will work for earlier and later schedules for the order. No set-up/configuration required

4.25 Log Number: 02694314

Summary of Call	Planning screen error
Detail of Fix	When user has a specific cost centre set then the schedule from trip tree is defaulted to from schedule of the order well screen.
Set-up and Configuration	No set-up/configuration required

4.26 Log Number: 00516061

Summary of Call	Ref: 21507: Trip resource not updating
Detail of Fix	The tractor as well as the driver for the trip will be stored as advised by Paragon via the API.
Set-up and Configuration	No set-up/configuration required

4.27 Log Number: 00510181

Summary of Call	Ref: 20978: Scheduling engine performance
Detail of Fix	Queries changes to have better execution paths, removing full table scans
Set-up and Configuration	No set-up/configuration required

4.28 Log Number: 02722382

Summary of Call	Order API interface
Detail of Fix	Fix has been made as the main version 5.25 had a flaw while inserting the value into CLOB after trimming the carrier ID to 6 when it's a 3PL carrier.
Set-up and Configuration	No set-up/configuration required

4.29 Log Number: 00499590

Summary of Call	Waterfall Screen Updates - following release of 495483
Detail of Fix	If there are less than 2 stops for a trip then the distance of the trip is made to zero, which can be viewed in waterfall screen.
Set-up and Configuration	No set-up/configuration required

4.30 Log Number: 00517612

Summary of Call	Can't enter default vehicle for a driver
Detail of Fix	Issue with Resource Form versions 2.196-2.197, corrected in version 2.198.
Set-up and Configuration	No set-up/configuration required

4.31 Log Number: 00517795

Summary of Call	Services supplied from Other Work and Vehicle lines have not been added to the order Added the qty_to_deliver - will be updated for the order items when null.
Detail of Fix	Prevented the creation of VEHICLE/INSPECT items.
Set-up and Configuration	Omitted WPX_PRODUCT_ID from the update of the order items. No set-up/configuration required

4.32 Log Number: 00517913

Summary of Call	Not including TO_DELIVER quantities
------------------------	-------------------------------------

Detail of Fix

The COL message will be generated for the API events.

Set-up and Configuration

Updates the despatched quantity for a product when an item is collected

No set-up/configuration required

4.33 Log Number: 00517899**Summary of Call**

CTL Call Logging - No services displayed in Services Only table

Includes RIGID and VEHICLE types of vehicles.

Detail of Fix

Excludes 'CANCELLED', 'DELETED', 'ABANDONED', 'REJECTED' trips.

Set-up and Configuration

No set-up/configuration required

4.34 Log Number: 00517783**Summary of Call**

Order Vehicles section not exported to Elucid.

Detail of Fix

The messages for the API events will include the <ORDER_VEHICLES> section when a vehicle exists for an order.

Set-up and Configuration

No set-up/configuration required

4.35 Log Number: 00517813

Summary of Call	Services Supplied not populated on order items
Detail of Fix	The services for the order will be created when the item for the VEHICLE SERVICE is added as well as when it is updated.
Set-up and Configuration	EPOD will provide the service for the vehicle in the EPL_FAULT item for this purpose. No set-up/configuration required

4.36 Log Number: 00518292

Summary of Call	Vehicle Search - Customer Vehicles are showing NOT INSPECTED when they are.
Detail of Fix	Modified the code so that, Vehicle Inspection will now show the correct status.
Set-up and Configuration	No set-up/configuration required

4.37 Log Number: 00519173

Summary of Call	EPOD Interface - Adding installs to fleet inspection is missing customer vehicle
Detail of Fix	The customer vehicle will be stored for the order items when the item is created for the serviced product based on the EPL_CODE_2 when the EPL_CUST_VEHICLE is not provided.
Set-up and Configuration	Separate items will be created for VEHICLE-SERVICE by customer vehicle. No set-up/configuration required

4.38 Log Number: 00518660

Summary of Call	CTMS Import - Tyres import fails.
Detail of Fix	Amended IMP package to process LOAD_INDEX as a character value
Set-up and Configuration	No set-up/configuration required

4.39 Log Number: 00519909

Summary of Call	Reset the Send to Paragon flag in Routes Maintenance
Detail of Fix	The 'Send to Paragon' flag in the 'Routes Maintenance' screen will have a default value of 'Y' to send the route to Paragon when Paragon is implemented.
Set-up and Configuration	The box may be unticked to prevent the route being used in Paragon. No set-up/configuration required

4.40 Log Number: 00521007

Summary of Call	Customer/Cost Centre shows error when entering the screen
Detail of Fix	Updated the CUSTOMER_NAME and CONTACT_NAME in form to 50 to match the database column and to stop the error prompt when opened the Customer/cost centre maintenance screen.
Set-up and Configuration	No set-up/configuration required

4.41 Log Number: 00520185

Summary of Call	Customer Vehicle Import fails
Detail of Fix	The CUST_FLEET import will use a mandatory CUSTOMER_ID to maintain the vehicle information for the tractors, axles, tyres and locations.
Set-up and Configuration	Types of locations may be BRANCH and INV. No set-up/configuration required

4.42 Log Number: 00518002

Summary of Call	CTL Call Logging - Subsequent job booked onto already completed stop
Detail of Fix	System parameter TRM_PREVENT_ORD_ON_COMP_STOP when set to Y this prevent any order being planned onto a completed stop
Set-up and Configuration	

New Parameters			
Parameter Name	Config Level	Setting Value	Result
TRM_PREVENT_ORD_ON_COMP_STOP	SYSTEM	Y	Prevent orders being added to completed stops

4.43 Log Number: 00519864

Summary of Call	Booking job onto already existing job result sin trip end time being reset
Detail of Fix	Add system parameter TRM_SHIFT_TIMES_FOR_TRIP to prevent end time of trip being updated to not be the end of a drivers shift
Set-up and Configuration	

New Parameters			
Parameter Name	Config Level	Setting Value	Result
TRM_SHIFT_TIMES_FOR_TRIP	SYSTEM	Y	Use start and end time of shift for start and end times on trip

4.44 Log Number: 00518589

Summary of Call	CTL Call Logging - Cancel/Delete order does not prompt for reason code
Detail of Fix	Development done on CTL and CTMS, reason codes added to order in CTMS and status set to CANCELLED
Set-up and Configuration	No set-up/configuration required

4.45 Log Number: 00520332

Summary of Call	CTMS EPOD Interface - Main address does not include Lat/Long
Detail of Fix	Lat/longs added to Job node
Set-up and Configuration	No set-up/configuration required

4.46 Log Number: 00520335

Summary of Call	CTMS-PORTAL TTM Interface - Orders still showing as part-delivered in Order Visibility
Detail of Fix	Van stock items debriefed at collection
Set-up and Configuration	No set-up/configuration required

4.47 Log Number: 00521914

Summary of Call	Treat FAILED jobs as a cancellation message to outbound API.
Detail of Fix	Update the status of FAILED orders to CANCELLED within the message for outbound API messages
Set-up and Configuration	

New Parameters			
Parameter Name	Config Level	Setting Value	Result
INCLUDE_FAILED_ORDERS	COST CENTRE	Y	Send Failed orders to Outbound API and change the status in the message to CANCELLED

4.48 Log Number: 00522359

Summary of Call	EPOD Device - Vehicle search produced many tyres
Detail of Fix	Update cursors to include customer details
Set-up and Configuration	No set-up/configuration required

4.49 Log Number: 00521338

Summary of Call	Lat Longs not created
Detail of Fix	Fixed issue which was avoiding the population of Lat/Long.
Set-up and Configuration	No set-up/configuration required

4.50 Log Number: 00522300

Summary of Call	Use actual times if present when determining arrive/depart times when new order applied to trip
Detail of Fix	Use actual times from previous stop to calculate arrival at next stop
Set-up and Configuration	

New Parameters			
Parameter Name	Config Level	Setting Value	Result
TRM USE ACTUALS FOR STOP TIMES	SYSTEM	Y	Use actual times to derive new stop times

4.51 Log Number: 00522955

Summary of Call	Pass work type and position on all work types to Portal and update order line correctly
Detail of Fix	Pass work type and position to portal for all records
Set-up and Configuration	No set-up/configuration required

4.52 Log Number: 02737619

Summary of Call	Waterfall not displaying Weight on RPLS
Detail of Fix	Package changed to obtain weights correctly
Set-up and Configuration	No set-up/configuration required

4.53 Log Number: 00522214

Summary of Call	Unable to parse the Load Planning Request
-----------------	---

Detail of Fix
Set-up and Configuration

The address information for the trip stops and the orders will convert an '&' to '& amp;'
 No set-up/configuration required

4.54 Log Number: 00524609

Summary of Call
Detail of Fix
Set-up and Configuration

Generate van stock line for every Fit New install
 Added item identifier to epod message, created new V type record on orders
 No set-up/configuration required

4.55 Log Number: 00524544

Summary of Call
Detail of Fix
Set-up and Configuration

API Export - COL sent after DEL
 Change to trigger to stop second COL message being created
 No set-up/configuration required

4.56 Log Number: 00525198

Summary of Call	CTL Call Logging - Can't raise a top-up transfer against a service-only job
Detail of Fix	Fixed refresh of driver list for Top-Up transfers. Filtered out inactive drivers. Filtered out DELIVERED and FAILED orders from the Orders list.
Set-up and Configuration	No set-up/configuration required

4.57 Log Number: 00525976

Summary of Call	Cannot create services only without a product
Detail of Fix	Change is made to functionality that will enable to create a service when product is not provided without an error.
Set-up and Configuration	No set-up/configuration required

4.58 Log Number: 02466153

Summary of Call	Release Task
Detail of Fix	Performance issue - correct selection criteria
Set-up and Configuration	No set-up/configuration required

4.59 Log Number: 02719799

Summary of Call	Webfleet integration
Detail of Fix	Extended the field t_ext_ref length to VARCHAR2(50). Amended the EDI process name to the dp_reports audit message.
Set-up and Configuration	No set-up/configuration required

5 PRODUCT DEVELOPMENT

5.1 Log Number: 00474454

Summary of Call	Missing auditing for COL export events in the API
Detail of Fix	The web service audit records will be created for the COL events as well as the VLI, VLD and VUI events.
Set-up and Configuration	No set-up/configuration required

5.2 Log Number: 00489063

Summary of Call	Revert tier for pallet storage
Detail of Fix	The tier for the 'Warehouse' screen will revert to 'WAREHOUSE'.
Set-up and Configuration	No set-up/configuration required

5.3 Log Number: 00482059

Summary of Call	Enable RET orders to be added to PCL trips in the 3PL scheduling engine
Detail of Fix	Code change - changed the DP_3PL-SCHED package to allow RET orders to be added to PCL trips
Set-up and Configuration	No set-up/configuration required

5.4 Log Number: 00489611

Summary of Call	Duplication with TMS Orders
Detail of Fix	Any orders that are locked will not be submitted to the 3PL scheduling engine until they have been unlocked.
Set-up and Configuration	No set-up/configuration required

5.5 Log Number: 00481867

Summary of Call	Include the Send to Paragon flag in the import process for Fixed Routes
	Send To Paragon flag added to Import
Detail of Fix	Any new order lines should trigger an update to the Paragon API when the order is UNSCHEDULED not INVALID.
Set-up and Configuration	No set-up/configuration required

5.6 Log Number: 00497948

Summary of Call	Main version for DP_CARRIER_API
	Changes from branched version incorporated into main version
Detail of Fix	The functionality that is controlled by the system parameter 'CARRIER_API_MANIFEST_READY_TIME': setting it to a time will allow the bookingDate to refer to the packed date or the created date of the order instead of the late delivery date.
Set-up and Configuration	No set-up/configuration required

7 ADDITIONAL CHANGES

7.1 CTL

A CTL change is required with this release

7.2 Manual

A manual change is required for the following packages:

DP_PAR_API_STP - A branch version (5.20.1.1) is required for STA

DP_PAR_API - A branch version (5.18.1.1) is required for MAR
