1.2.2 FINAL 'END TO END' TESTING

If 'Yes' the auto despatch process will also check the 'Auto Despatch' flag of the order priority, which has been added in Order Priority Maintenance. This is also a 'Yes'/'No' flag, so Use Priority Settings is set to 'Yes' this must also be set to 'Yes' for an order to be automatically despatch confirmed.</p> <p>The automatic despatch confirmation process itself is a local EDI Process that can be set to run at the required frequency using the select_orders procedure in the new dp_auto_despatch package, i.e. by setting 'Package SQL Code' to dp_auto_despatch.select_orders in the XF Command Screen.</p> <p>The automatic despatch process will be delayed by the number of minutes set against the AutoDespatchDelay registry setting under Global/GeneralSettings. For example, if the delay was set to 30 minutes, and order was pack confirmed at 15:40 and the EDI process ran at 16:00 the order would not be despatch confirmed as 30 minutes had not yet passed.</p>
