1 SUMMARY INTRODUCTION

1.1 INTRODUCTION

The main aim of this document is to provide *CALIDUS* WMS users with the level of detail required to accurately test all software included in the patch. The document also contains set-up and configuration details to enable the user to configure the system correctly for the new functionality to work.

1.1.1 GLOSSARY OF TERMS

Term	Meaning
C-TMS	Transport Management System
C-WMS	Warehouse Management System
CR	Change Request
C-WCS	Warehouse Control System
C-ePOD	Electronic Proof of Delivery
C-MCS	Mobile Control System
C-TTM	Track and Trace Management
EDI	Electronic Data Interchange
TID	Testing Issue Development, or Log

1.2 TESTING PROCESS

1.2.1 TIDs AND RESOLUTION

If there are any areas of the functionality that are not acceptable or do not meet the requirement specified in the Change Request then these should be expressed by raising a TID.

1.2.2 FINAL 'END TO END' TESTING

Prior to release to a production database, a full 'End to End' test is required on the test system by all sites using the database. Once this is signed off, a release date can be arranged.

1.2.3 AUTHORISATION

Authorisation from nominated release personnel only will be required when requesting a release to a production environment

2 CHANGE REQUESTS

2.1 Customer Ref: 345469

OBS Log Number: 345469
Reporter: Howard Allen
Summary of Call New inbound order EDI based on JLO
 Generate new LBL format EDI sales order upload

Detail of Fix Amend both WES format pick list and despatch note - controlled by a new owner rule FOLM (Format Order Line Comment)

If set, the 'Order Line Comment' field has 'pack' and 'kit' headers added to the data. 'Order Line Comment' field is also not printed on despatch note.

Set-up and Configuration

Registry/Rules Settings		
Path & Name	Setting Value	Result
Owner/FOLC	Y	Add Order Line comment 'labels' to pick list and suppress data from despatch note
Format Order Line Comment	Not set or any other value	No Change

2.2 Customer Ref: Despatch Note Changes

OBS Log Number: 345951
Reporter: Sue Blake
Summary of Call Despatch Note Changes
Detail of Fix Create a new layout for customer despatch note.
Set-up and Configuration No set-up/configuration required

2.3 Customer Ref: Returns Processing

OBS Log Number: 346569
Reporter: Pamela Hodgkinson
Summary of Call Returns Processing
Detail of Fix Retain supplier code of stock rather than using supplier code of ASN - this is controlled by activating OWNER level rule USSC.

Set-up and Configuration

Registry/Rules Settings		
Path & Name	Setting Value	Result
Owner Level Rule USSC	Y	Ensure supplier of stock is used instead of the supplier code of ASN

2.4 Customer Ref: 346832

OBS Log Number: 346832
Reporter: Michael Huxley
Summary of Call Default stock supplier in add pallets
Detail of Fix Rule code APSR extended to have a value of .D. which will default in the normal supplier of the stock when creating new pallets.
Set-up and Configuration No set-up/configuration required

2.5 Customer Ref: Depatch note change

OBS Log Number: 347470
Reporter: Colin Cook
Summary of Call Despatch Note Change
 The 'Customer Pallet ID' column has been replaced by a 'Rotation / Batch' column to display the customer rotation number instead.

Detail of Fix The despatch details will be displayed sequentially within the sales order by ascending order of customer rotation number and then customer pallet ID.

The data will be displayed at the lowest level as before so that each despatch detail is displayed if the customer rotation number has been obtained for multiple rotation numbers, pallet IDs, customer pallet IDs or from multiple warehouse locations.

Set-up and Configuration No set-up/configuration required

2.6 Customer Ref: Pallet temp recording

OBS Log Number: 347903
Reporter: Matthew Tipping
Summary of Call Add pallet temp recording at receipt
Detail of Fix Trailer and pallet temperature recording using WCS

2.11 Customer Ref: PO 106282

OBS Log Number: 348046

Reporter:
Summary of Call

Sue Blake
 First release for log 344287
 Initial release for log 344287 - more to follow.

Please note that an additional change has been made to remove code that set a negative available total to zero if the CASB rule is "Y" or the 'Stock Snapshot Include in Free Qty' flag is set to "Y".

Detail of Fix

In order to zero a negative available total the 'ANAT' owner rule should be set to "N" or should not be set up.

For the DDU format stock snapshot to work the 'ANAT' owner rule MUST be set to "Y" to enable the GRN Free Quantities to be calculated correctly, however, the DDU format will then zero any negative quantities.

Set-up and Configuration

Registry/Rules Settings		
Path & Name	Setting Value	Result
ANAT Owner Rule	Y	Allows negative available totals on stock snapshot. This is required to allow quantities to be calculated correctly when adding on pre-advised quantities in the DDU format snapshot. Any negative quantities will be reported as 0 after the calculations have been performed.
CASB Owner Rule	Y	Subtracts committed quantities from available total.
DNCC Owner Rule	Y	Reports three character currency code as a suffix on the GEN format despatch note instead of having the currency symbol as a prefix.
SSMG Owner Rule	000-999	Optional. If set up this should be set to a three digit number (including leading zeroes, e.g. 005 not 5). This will then be the maximum number of GRNs to be included in the DDU format stock snapshot. If the rule is not set or is not set to a valid value this defaults to 10.

2.12 Customer Ref: Po No 106300

OBS Log Number: 348111
Reporter: Pam Hogkinson
Summary of Call Customer Despatch Note
 New GE2 despatch note format.

Detail of Fix Channel data maintained in 'Channel' tab in 'Owner Maintenance' screen.

Return reason codes maintained in 'Channel Return Reason Codes Maintenance'.

Set-up and Configuration

Registry/Rules Settings		
Path & Name	Setting Value	Result
MCOC Owner Rule	Y	Display the 'Channel' tab in the 'Owner Maintenance' screen. (Re-execute the query after entering for owner to display)

2.13 Customer Ref: PO No: 106297

OBS Log Number: 348151
Reporter: Unknown
Summary of Call Return Reason Codes Maintenance

Detail of Fix WHS0086 is a new screen that will need to be added to the menu structure. This allows return reason codes to be entered against an order channel. This is required for log 346463.

Set-up and Configuration

New Screens		
Suggested Menu Path	Screen ID	Screen Description
Warehouse Maintenance	WHS0086	Channel return reason codes maintenance

Set-up and Configuration	No set-up/configuration required

5.4 OBS Log Number: 346793

Reporter:	Tony Walker
Summary of Call	TID: Carrier Code The carrier code of the sales order can be used to set a mandated carrier for the transport order. An interface parameter called INC_MANDATED_CARRIER will be used to set the carrier: when Y the functionality will be active. The carrier code will be translated using a new import decode with the name WMS_CARRIER_MAPPING of type CARRIER: the source value will store the carrier code from WMS and the target value will store the carrier code in TMS. The mandated carrier code must be valid for the order to be created or amended when the mandated carrier is enabled and one exists for the sales order to use. If the carrier code of the sales order is changed, the transport order will be updated to match.
Detail of Fix	This log will store the changes to WMS and the changes to TMS will be released under 346789. The carrier code of the route/load will likewise be translated in reverse for the carrier of the trip using WMS_CARRIER_MAPPING. This will apply to the LOAD and DESP messages for when a route/load is created or updated for a LOAD message, or despatched for a DESP message. The route code of the load in WMS will be based on the carrier route code in preference to the other available route codes for PAR trips. For LOG trips, the trip route code will be used. For trips that are not LOG or PAR, the trip route code will be used in preference to the carrier route code and customer route codes.
Set-up and Configuration	No set-up/configuration required
