Installation Instructions

Installation Instructions	Notes:
For full upgrade installation instructions, please see the WCS Installation Guide. - Log off all RDT users. - Stop all WCS Maintenance sessions accessing the database - Stop the WCS Server process. - Make a backup copy of the old program, if required. - Copy the released versions of this program to the correct area on the TEST machine, normally C:\Program Files\Warehouse Control Server - If the database structure has been released to you, the database should be converted as described in the WCS Installation Guide. - Restart the programs.	1. If you use Oracle WMS, the program WCS-Server_OAQ_WMS.exe should be run whenever WCS Server is chosen from the Start menu. 2. Some releases may also require WMS patches to be in place. Please check with your release co-ordinator to ensure that these releases have been completed before testing.
