Ready for **What's Next, Now**™

Registry/Rules Settings		
Path & Name	Setting Value	Result
RFO1 owner/warehouse rule	"X"	The rule now has a new option, "X". When set to "X" if the location to be picked from is not a pick location, the pick quantity is the full pallet quantity and is greater than or equal to the standard pallet quantity, then the Source Loc Use Type will be set to "X" for the WCS to identify it as a full pallet pick task to be treated as a part pallet pick task, otherwise it will be set to "2" as with the "Y" option.
RPSP owner rule	"0" - "9"	If the RPSP owner rule is set to a numeric value (0-9) it will be used to populate the RDT Priority, otherwise if the RPSP warehouse rule is set to a numeric value (0-9) that should be used. If neither is set to a numeric value (0-9) then the field will remain blank.
RFOI owner rule	"Y"	The RFOI rule can now be set up a an owner rule as well as a warehouse rule, with the setting for the owner taking precedence.

Warning: A WCS Change is required with this release.
