EMERGENCY RELEASE - WMS 810

RELNOTE ER018-039

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks	Reporter
TRG_INS_IAJD.sql	Trigger	4.22	336462	Last activity date	3	Create new table WLE AUDIT When a pallet is amended, picked etc which is indicated by the creation of an INVENTORY AUDIT JOURNAL DETAIL record, a new WLE AUDIT record will be created. But unlike the audit table, when the pallet is removed from the system, the pallets WLE Audit record will be deleted. This table will allow the user to view the last date a pallet is 'touched' and the last audit type ie ADJ, PICK, SALE etc. This will allow users when running Inventory / Pallet ORS report to select pallet ranges and see the last touch date of the pallet.	Paul Reed
