EMERGENCY RELEASE - WMS 810

RELNOTE ER020-016

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks	Reporter
AT_ORDER_PRIORITY_337092.sql	Alter table Script	4.1	337092	-	3	Auto Despatch Options added to Sales Order tab in Owner Maintenance. Allow Auto Despatch has three options: N: No automatic despatch confirmation At Pick Confirmation: Orders despatch confirmed after being pick confirmed (status 6) At Pack Confirmation: Orders despatch confirmed after being pack confirmed (status 6 and pack complete - "Y") Use Priority Settings has two options, "Yes" and "No". If "Yes" the auto despatch process will also check the 'Auto Despatch' flag of the order priority, which has been added in Order Priority Maintenance. This is also a "Yes"/"No" flag, so Use Priority Settings is set to "Yes" this must also be set to "Yes" for an order to be automatically despatch confirmed. The automatic despatch confirmation process itself is a local EDI Process that can be set to run at the required frequency using the select_orders procedure in the new dp_auto_despatch package, i.e. by setting 'Package SQL Code' to dp_auto_despatch.select_orders in the XF Command Screen.	Pam Hodgkinson

Ready for **What's Next, Now**™

						The automatic despatch process will be delayed by the number of minutes set against the AutoDespatchDelay registry setting under Global/GeneralSettings. For example, if the delay was set to 30 minutes, and order was pack confirmed at 15:40 and the EDI process ran at 16:00 the order would not be despatch confirmed as 30 minutes had not yet passed.	
AT_STK_STOCKIST_337092.sql	Alter table Script	4.1	"	"	"	"	"
DATA_ML_CAPTIONS_337092.sql	Data Script	4.1	"	"	"	"	"
SOS1600.fmx	Order Priority Maintenance	4.11	"	"	"	"	"
STS1000.fmx	Owner maintenance	4.96	"	"	"	"	"
DP_AUTO_DESPATCH.sql	Automatic Despatch Confirmation	4.3	"	"	"	"	"

Registry/Rules Settings		
Path & Name	Setting Value	Result
Global/GeneralSettings/AutoDespatchDelay	Delay time in minutes, 0 to 999	The automatic despatch confirmation process will not despatch confirm an order until the set number of minutes has passed since it was pick/pack confirmed (depending on the value of the Allow Auto Despatch flag.)
