EMERGENCY RELEASE - WMS 810

RELNOTE ER026-118

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks	Reporter
DP_RDT_PALLET_MOVE_REQ.sql	Pallet/Stock move Print/Generation	4.31	350160	DYNAMIC PICKS	3	<p>The specification stated that BUILD_UP_LOCN22 was to be used to store the dynamic pick location but that was already used. BUILD_UP_LOCN25 has been added. This will need to be populated outside of the system as it has not been added to the maintenance screen.</p> <p>ALLOC_RESTRICT on STK_STOCKIST will also need to be populated outside of the system as it has not been added to the maintenance screen.</p> <p>The allocation process has been changed to check this flag and location. If the flag is set to 2, the location has been entered and a replenishment is required this location will be used instead of the defined pick face if a different issue life has been entered against the order line which results in stock being allocated out of sequence, i.e. if the stock would have been out of date if the stock issue life was used or if stock with an earlier sell by date would have been allocated. This only applies to stock with the Allocation Sequence set to Sell By Date.</p>	Matt Tipping
