EMERGENCY RELEASE - WMS 810

RELNOTE ER028-008

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks	Reporter
DATA_WAREHOUSE_RULES_CONTROL_352120.sql	Data Script	4.1	352120	DESADV EDI Developme	3	New DESADV sales order file processing for format JO1. The EDI process will need to be setup for this EDIFACT file format to generate the file when the sales order is despatched from the warehouse. Default WMS translations will be required to construct the UNA, UNB and UNH segments for code DESADV-OUT-JO1. WMS translations for this code will also be required to translate the warehouse pallet types to the codes that are recognised in the QTY segments (e.g. BOX as PK for Package, EUR as 201 for Euro Pallet, STD as 202 for Standard Pallet). A new owner rule can be used to process the data: IUNA (The UNA segment will be included in the outbound EDIFACT file format when Y) New EDI directories in UNIX and the FTP server will be required for the new EDI processes.	Phil Harding
