EMERGENCY RELEASE - WMS 810

RELNOTE ER028-047

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks	Reporter
DP_EDIGEN_PRE_ADVICE_LOAD.sql	Inbound goods receipt EDI database package	4.48	353874	-	3	The processing of PREADV files has been changed: The test indicator will be assessed as a live file by default and the owner rule ATGR will be used to allow test files to be uploaded into WMS to create the GRN. The processing of RECADV files for format JO1 has been changed: The manual GRNs will only be included when the owner flag allows all GRNs and not just EDI GRNs to be included. The test indicator will be included in the 11th section in the UNB segment. The NAD_BY segment will include the code and name of the owner of the goods in the warehouse. The code will match the code in the 3rd section in the UNB segment. The NAD+LSP segment will include the code and name of the company that is storing the goods. The company code will be translated first using the COMPANY_GLN value for the COMP level or the COMPANY_CODE value for the OWNR level should those translations exist.	Craig Hopcroft

Ready for **What's Next, Now**™

						The NAD_SF segment will include the code and address of the supplier of the goods. The supplier code will be translated first using the SUPPLIER_GLN value for the OWNR level or the SUPPLIER_CODE value for the OWNR level should those translations exist. GLN codes will be identified by a 9 otherwise the codes will be identified by ZZZ.
