EMERGENCY RELEASE - WMS 810

RELNOTE ER030-012

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks
AT_CUSTOMERS_351668.sql	Alter Table Script	4.1	351668	MOG-Req 3	3	New consolidated cubing processing. The new 'Consolidated Picking' flag for the customer will need to set to 'Yes' to activate the assessment of allocated stock for consolidated sales orders on a cubed pallet. The TMS-WMS interface messages to create and maintain route/loads for the trips will need to be made inactive in the 'Locations' maintenance screen for the depots/warehouses that will use 'Pick Waving'.

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks
AT_LOAD_HEADER_355780.sql	Alter Table Script	4.1	355780	-	3	The ASN reference for the MNS despatch advice message will be based on a database sequence number for when the TMS-WMS interface is not active. This number will be used as the load reference number. The MNS and TES despatch advice message will include any consolidated sales orders in the same pack reference when they have are contained on the same pallet. The production of the MNS despatch note will not require a TMS trip reference to be stored for when the TMS-WMS interface is not active. The load reference number will be generated for the route/load using the database sequence number when either the despatch note is printed first or the ASN message is generated first.
