Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks
AT_CUSTOMERS_354512.sql	Alter Table Script	4.1	354512	-	3	<p>Refers to new parameters 'Single SKUs per Pallet' and 'Allow SKUs on Split Pallets?'.  'Single SKUs per Pallet' can be N (not single SKU pallet building), Y (single SKU pallet building) or A (single SKU pallet building but allow top-up with stock for other SKUs).  'Allow SKUs on Split Pallets?' can be N (do not allow remaining stock for SKU to be split over multiple pallets) or Y (do allow split pallets).  A pre-pass process will be run when the above parameters are active to ensure that the stock for the SKUs is processed first to build full pallets or to build a part pallet for a SKU and then top-up with stock for another SKU as long as that stock can be included in the remaining space on the pallet when the SKU is not allowed to be split over multiple pallets.</p>
