## EMERGENCY RELEASE - WMS 810

RELNOTE ER030-070

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks
PFS1520.fmx	Product Master Validation	4.16	356639	Release 2	3	<p>Second schedule release for log 355795. Includes further changes to the Multi-Level Packing - Detail Level screen (WHS1946A) to allow cases to be split into units if the Break Cases flag is set to "Yes" for the stock code. Order Number LOV changes to match WHS1946, so only lists order not fully packed. No longer need to save changes to pack detail quantities before continuing packing. Validation added when barcode scanned to error if serial numbers required and barcode UOM is not either UOM1 or UOM2 of stock code.</p> <p>Standard inbound EDI product master upload (STID) changed to include the three new fields added to the stock table. Inbound EDI Product Master Screen (PFS1520) changed to add the three new fields so invalid values received can be corrected. Configurable inbound EDI changed to add the three new fields to the "Stock" and "Stock Update" load types. However, the "Stock Update" load type appears to be redundant so it is recommended that only "Stock" is used.</p>
