1 Asset Tracking

The Asset Tracking page (assetTracking) can be used to find the location of an asset, or list of assets.

The asset(s) to find should be entered on the left side of the page in the Asset Search, then when the user clicks on Find, the location of the assets (if known) will be displayed on the right hand side along with the dwell time at the location, and whether the asset has been marked inactive on the *Calidus* TMS
