Customer Maintenance

# Contents

1 Customer Maintenance

The Customer Maintenance page allows maintenance of Address and Customer Information for customers on the *Calidus* Portal system.

The user will select an owner then the customer they want to maintain. They can then modify the Customer Address and Customer Information.

Note: None of the "Customer Information" fields above are currently sent to the *Calidus* Portal system via XML, so this is the only place where these fields can be entered/maintained.

Note: Any data changed on this page will ***only*** apply to the *Calidus* Portal - data updates will not be transmitted to external systems.
