The user can access the page settings by clicking in the 'burger' menu on the top right of the main page:

Options

**Depot**

M1 - MANCHESTER BLOOD CENTRE

**Planned Departure**

1 Hr  2 Hrs

**Page Refresh**

30 Seconds

**Minimum Data Refresh**

2 Minutes

Reset
Go
Close

- Depot** - The location from which the collections/deliveries are being made. The list of locations in the drop-down will be determined by the *Calidus* Portal RDC restrictions setup against the users group, and may only contain one value.
- Planned Departure** - A time range to track collections/deliveries. For example in the above setup, the page will display planned collections/deliveries from the selected depot within the next 2 hours. Up to 12 hours can be tracked.
- Page Refresh** - The page will display up to 3 collections/deliveries at any one time. If there are more than 3 collections/deliveries, then this setting determines how long each set of collections/deliveries remains on the page before the next set of collections/deliveries are displayed. The values in the drop-down are 10, 15, 30 and 60 seconds.
- Minimum Data Refresh** - This setting determines the *minimum* time before the page returns to the server to retrieve the latest information. The page will retain the last time a data refresh was made, and once the time in the drop-down has been exceeded, the page will continue to display data until it reaches the last page of data, then refresh the data from the server. If the data refresh has not been exceeded when the last page has been reached, it will return to the first. The values in the dropdown are 2, 5 and 10 minutes.
- Reset Button** - This will reset the options to their default values and refresh the page.
- Go Button** - This will refresh the data using the currently selected options.
- Close Button** - This will close the options page without refreshing the data, but note that any changes to the options will be kept and used on the next refresh.

The despatch board will display the selected location:

MANCHESTER BLOOD CENTRE							
Ready for <b>What's Next, Now™</b>							

And up to 3 trips per page. A single trip may look like:

MAN-05		RTE-01433601	15:30	NHSBT Manchester Transport	8 Orders   16 Tags   16 Boxes		
Inter-Centre	M01503687	00004-B		MA - Liverpool Blood Centre	16:15	CRATE	50552324AAA57470
Inter-Centre	M01503692	00001-B		MA - Liverpool Blood Centre	16:15	CRATE	50552324AAA34269
Inter-Centre	M01503695			MA - Liverpool Blood Centre	16:15		
Del Stock	M01503715	00001-B		MA - Liverpool Blood Centre	16:15	CRATE	50552324AAA23632
Del Stock	M01503715	00002-B		MA - Liverpool Blood Centre	16:15	CRATE	50552324AAA23702
Del Stock	M01503715	00003-B		MA - Liverpool Blood Centre	16:15	CRATE	50552324AAA46693
Del Stock	M01503407	00001-B		MA - Liverpool Blood Centre	16:15	CRATE	50552324AAA10160

The top line of the trip contains the following information:

- **Route Id** The Route Id for the collection/delivery
- **Trip Id** The Trip Id for the collection/delivery
- **Time** The first planned collection/delivery from the selected location
- **Carrier** The name of the carrier (if available)
- **Driver** The name of the driver (if available)
- **Trailer** The Trailer ID (if available)
- **Totals** This consists of a total count for:
  - ◆ **Orders** The orders being collected/delivered from the selected location
  - ◆ **Tags** The number of 'buffer tags' i.e. distinct order/product combinations
  - ◆ **Boxes** The number of distinct asset Id's

After the top line, the page will display the detail lines for that trip:

- **Delivery Type** The description of the delivery type e.g. Collect, Deliver Ad-Hoc etc.
- **Order** The Client Order / External Reference
- **Item Id** The Item Identifier
- **Location** The destination location for the trip leg
- **Time** The planned arrival at the destination location
- **DU Type** The description of the DU Type
- **RAG Status** This will have the following:
  - ◆ Green If the item has been 'tag2asset' scanned.
  - ◆ Red If the item requires scanning, but has not yet been scanned.
  - ◆ Amber If neither of the above conditions is met, usually because the order is not a pulse order.
- **Asset ID** The Asset Id. If the collections/deliveries has multiple lines in the same box, a \*

will be displayed next to the Asset Id.

If any of the assets are RAG Amber or Red, then the details will be highlighted, for example:

All Green:

TNT-P128/1... MAN-01437751		17:12	TNT Tooting	3 Orders   4 Tags   4 Boxes

Del Stock	P01544307	00001-B		P144 - Royal Sussex Hospital	19:30	VAQTEC_Large	50552324AAA45803		
Del Stock	P01544308	00001-P		P144 - Royal Sussex Hospital	19:30	BOX			

Up to 8 detail lines will be displayed for each trip detail at any one time - if the number of detail lines exceeds 8, then they will be cycled one detail at a time. Note that this scrolling is independent of the refresh parameters in the options page, and is not configurable by the user.

At the base of the page:

Total Trips: 5 Total Orders: 23 Page 1/2  05-Apr-2023 16:28:59

The footer will contain the following:

- **Total Trips** The total number of trips within the selected Planned Departure range for

the selected location

Ready for What's Next, Now™

- **Total Orders** The total number of order within the selected Planned Departure range for the selected location

- **Page** A page x/y display and buttons to manually cycle through the pages
- **Date/Time** The current date/time from the server.
