# 1 Main Page

Welcome to the *CALIDUS* Portal Assist help pages.

Here you will find all kinds of guides, from simple to advanced, from user guides to technical implementation guides, all to provide as much information on how to get the best out of your *CALIDUS* Portal implementation.

Assuming you are now up and running with your system, why not try to find something you didn't know? Try clicking the 'Did You Know' link below.

## Did You Know

That's how Assist works - help broken down into bite-size chunks, designed to help you make the most of your system. If you're familiar with the web, and familiar with Wiki, you're going to find it easy to get around in Assist.

If you're coming here as a new user without a clear idea of how *CALIDUS* Portal works or what it does, you should start with the overview - that will give you enough information so that you're clear on what we're achieving with this application. You'll find it in the list below [here](#).

If you're more comfortable with documents rather than web pages, we've got you covered.

Every page here can be downloaded as a PDF (including this one) by clicking the *Download as PDF* link in the toolbar, typically on the left of your browser window. That will give you the PDF of just that page, but if you want something more formal, see the heading below called [Documents](#) - downloading those as PDFs will give you the formal Aptean document.

As you can see, some of the guides are multi-page, so we organise those into categories of pages. Where those pages form a guide themselves (like the C-TMS Key Functionality), you can use that *Download as PDF* link again from the category to get all of the pages in one handy guide.

We keep these pages up to date based on the latest available version of *CALIDUS* Portal - if you see something you like here, but aren't sure whether your version supports it, why not give our team a call? We can advise you on the steps you need to take to upgrade your system to the latest and greatest.

We're constantly updating the system, and that means that we're constantly updating the documentation too. One of the great things about Wiki pages is that the history is kept, so you can click the *View History* link (usually at the top of the page) to see all previous versions of the help page. So, although all the guides are the latest version, you can still access the older pages for reference.

The same is true of any of the pictures that we've uploaded in these guides - click on them and you can see the whole history of that picture. You can download them as well, if you like.

Of course, we also keep PDF copies of the previous version of the documentation when we've finished it, so we can always provide them to you. We've generated them from these Assist pages just like you can - because it's that easy to use.

Below you'll find links to all of the guides in this Assist system.

## 1.1 Documents

All formal documents can be accessed by clicking the title above.

### 1.1.1 Getting Started

- [Calidus Portal User Guide - Architecture](#)
- [Glossary](#)

### 1.1.2 Modules

The following are links to all of the pages within each Calidus Portal module.

- [Category:Calidus Portal CORE](#)
- [Category:Calidus Portal TTM](#)
- [Category:Calidus Portal TMS](#)
- [Category:Calidus Portal WMS](#)

### 1.1.3 Guides

All documents can be accessed by clicking the title above, where the documents are grouped by area, as well as full compiled guides. Below are some links to stand-alone guides:

[Calidus Portal User Guide - CORE](#)

[Calidus Portal User Guide - TTM](#)

[Calidus Portal User Guide - TMS](#)

[Calidus Portal User Guide - WMS](#)

### 1.1.4 Connected Systems

- [EPOD](#)
- [C-TMS](#)
- [WMS](#)

### 1.1.5 Incomplete

Several screens are in the process of being updated or created at any time. We tag those screens so that we can easily identify them. Click the section title to see a list of those screens that are in the process of being documented.
