1 Messaging

This page allows an admin user to send messages across the system, to a specific group or a specific user.

The image shows three separate interface panels arranged vertically. The top panel is titled "System Message [Permanent]" and contains a text input field and two buttons: "Set" and "Remove". The middle panel is titled "Group Message [One-Off]" and includes a dropdown menu for "Group" set to "All Groups", a text input field containing "Test Message For Everyone", and a "Send" button. The bottom panel is titled "User Message [One-Off]" and includes a dropdown menu for "User" set to "All Users", a text input field, and a "Send" button.

Note: The message will only be received when the recipient performs an action which returns data to the server e.g. performs an update, search or selects a menu item. The message will be displayed using the browsers standard dialog box, e.g.:
