Order Upload - WMS

Contents

1 Order Upload - WMS

The WMS Order Upload page can be used to upload orders on the *Calidus* WMS system and enquire on CSV Order files. The ORD_UPLOAD setup on the *Calidus* Portal will be used to store the required setup for this page:

Module	Section	Key	Admin	Description	Value
	WMS - ORD_UPLOA ∨		∨		
WMS	WMS - ORD_UPLOAD	DIR	N	Directory to put the files in	
WMS	WMS - ORD_UPLOAD	IP	N	IP of WMS machine to put files	
WMS	WMS - ORD_UPLOAD	PASS	N	Password for WMS Machine	
WMS	WMS - ORD_UPLOAD	SECURE	N	Is this FTP or SFTP?	FTP ∨
WMS	WMS - ORD_UPLOAD	USER	N	User for WMS Machine	

The header section on the Upload page will contain the following sections:

Owner

Owner SPE : SPE OWNER ∨

Upload File

Choose file | No file chosen [Clear] [Upload]

Parameters

Upload Date From 12-Apr-23 To 12-Apr-23 Status All ∨ [Find]

- Owner - A drop-down based on the users' visibility of owners. This will control the visibility of the CSV files in the main section.
- Upload File - this allows the user to upload a new CSV file through their browsers standard file selection box. Only files with an extension of 'csv' will be found in the file selection window. See the 'Uploading Files' section below for details.
- Parameters - a set of filters for finding existing file uploads:

- Upload Date (Range) - the date the file was originally uploaded. The default for both the From/To will be the current date.
- Status - either 'All', 'PENDING', 'SUCCESS' or 'FAILED'. The default status will be 'All'.
- 'Find' Button - to display the files for the above selection.

The main section will display the found orders based on the above selection criteria.

			No. Orders		
ID	Filename	Upload Date/Time	Success	Failed	Status
181105110100	POD_ORD_TEST14.csv	12-APR-23 15:15	2	0	SUCCESS
181105101800	POD_ORD_TEST_ERR3.csv	12-APR-23 15:15	0	1	FAILED
181105090200	POD_ORD_TEST_ERR2.csv	12-APR-23 15:15	0	1	FAILED
181102094800	POD_ORD_TEST_ERR2.csv	12-APR-23 15:15	0	0	FAILED
181101142000	POD_ORD_TEST_ERR2.csv	12-APR-23 15:15	0	1	FAILED
181101131400	POD_ORD_TEST_ERR1.csv	11-APR-23 15:16	0	1	FAILED
181101113800	POD_ORD_TEST12.csv	11-APR-23 15:16	2	0	SUCCESS
181101110800	POD_ORD_TEST11.csv	11-APR-23 15:16	2	0	SUCCESS
181101104000	POD_ORD_TEST8.csv	11-APR-23 15:16	0	2	FAILED
181031145400	POD_ORD_TEST6.csv	11-APR-23 15:16			PENDING
181031144600	POD_ORD_TEST5.csv	11-APR-23 15:16	0	1	FAILED
181031143900	POD_ORD_TEST4.csv	11-APR-23 15:16			PENDING
181031125800	POD_ORD_TEST2.csv	11-APR-23 15:16			PENDING

- ID - the unique ID generated by the *Calidus* Portal during the file upload

- Filename - the uploaded filename
- Upload Date/Time - the date/time the file was uploaded onto the *Calidus* Portal
- No. Orders / Success - the number of orders processed in the file (only visible if the status is not 'PENDING')
- No. Orders / Failed - the number of orders processed in the file (again only visible if the status is not 'PENDING')
- Status:

  ♦ 'PENDING' - File has been uploaded by the *Calidus* Portal but not yet processed on *Calidus* WMS
  ♦ 'SUCCESS' - File has been loaded into *Calidus* WMS with no errors
  ♦ 'FAILED' - At least one order was not successfully loaded into *Calidus* WMS.

For 'FAILED' CSV files, clicking on the line will open a window with details of the error(s):
