# 1 Stock Enquiry

This page allows the user to look at the physical stock available in the warehouse. The page will initially display a parameter page:

Parameters			
Owner	SPE : SPE OWNER ▼		
Show Stock By	Batch id ▼		
Stock Code	<input type="text"/>		
Location	From <input type="text"/>	To <input type="text"/>	
Batch id	From <input type="text"/>	To <input type="text"/>	
Customer Rotation	From <input type="text"/>	To <input type="text"/>	
<input type="button" value="Clear"/>			
<input type="button" value="Find"/>			

The user may optionally enter a Stock Code and ranges for Location, Batch and Customer Batch for selection. The 'Show Stock By' drop-down will determine the sub-level detail displayed once a stock code has been selected. The values will be 'Location' or 'Rotation' (or 'Batch'). Once the user clicks the 'Find' button, a warehouse level detail will be displayed:

Warehouse Details							
Warehouse Id	Description	Weight	On-Hand Qty	Committed Qty	Allocated Qty	Held Qty	Free Qty
NPT	Default Warehouse Name	31.967	52 / 1	0 / 0	0 / 0	2 / 1	50 / 0
SPE	SPE Warehouse	547732.69	100423105 / 2987	70 / 0	37904 / 162	37744 / 1	100347387 / 2824
Totals		547764.357	100423157 / 2988	70 / 0	37904 / 162	37746 / 2	100347437 / 2824

If the selection appears in multiple warehouses (as shown above) then there will be one detail line per warehouse. Selecting a warehouse line will drill-down into a stock level detail for that warehouse:

From the stock level detail, either the Location level or Batch level details will be displayed, dependent on the value the users selected from the parameter page:
