Adding a New Wavelink Host

Contents

1 Adding a New Wavelink Host

Find and turn on a working RF hand held device

Ready for **What's Next, Now**™

Right click on the Live or Production Icon on the RF screen and note down the Host Address and Port Number.

Alternatively there could be a unique fixed I.P. for each individual gun, these are normally allocated from a provided range of I.P.?s.

Ready for **What's Next, Now**™

Then select the Add new icon on the device that you want to setup to connect to the WMS system.

Ready for **What's Next, Now**™

Enter the Host Name, Host Address and Port number as noted down into the New Profile screen, then select the Update Button.

The live Production Icon should now be available. Press to enter the system.

Ready for **What's Next, Now**™
