1 BWS0070 Commodity Codes Maintenance

This is the *Commodity Codes Maintenance* screen (*BWS0070*).

The following fields document the primary data for the commodity code record:

Field Name	Description
<i>Commodity Code</i>	The primary identifier for the commodity record. This code is often used to classify goods for customs or inventory purposes.
<i>Description</i>	A brief, clear description of the goods or services that fall under the commodity code.
<i>SAD Regime</i>	The classification required under the Single Administrative Document (SAD) customs form. It specifies the type of transaction (e.g., Export, Import).
<i>SAD Description</i>	Detailed internal notes or a description related to the SAD regime, often containing specific product information or reporting instructions.
