1 BWS0070 Commodity Codes Maintenance

This is the *Commodity Codes Maintenance* screen (*BWS0070*).

The following fields document the primary data for the commodity code record:

Field Name	Description
Commodity Code	The primary identifier for the commodity record. This code is often used to classify goods for customs or inventory purposes.
Description	A brief, clear description of the goods or services that fall under the commodity code.
SAD Regime	The classification required under the Single Administrative Document (SAD) customs form. It specifies the type of transaction (e.g., Export, Import).
SAD Description	Detailed internal notes or a description related to the SAD regime, often containing specific product information or reporting instructions.
