

This is the *Multi-lingual Translations* screen (MLS0010). This area of the system allows users to view, manage, and refresh the various language translations used across the application. The screen is divided into four main functional areas accessible via the tree menu:

- *ML Screens*
- *Language*
- *Translations*
- *Refresh Screen*

ML Screens

This form is used to enter translation details for specific screen elements.

Multi-Lingual Captions Screen

Company: JP1 Department: 0000 07-NOV-2025 MLS0030 v4.3

Primary Selection Criteria

Code: ACTION Language: ENG

Secondary Selection Criteria

Value	Language	Caption Text
A	ENG	Add
D	ENG	Delete

Other Languages

Value	Language	Caption Text
A	ESP	Add
A	SWE	Add

Record: 1/2

2.1 Primary Selection Criteria

These fields define the key record being edited:

Field Name	Description
Code	The internal system code or identifier for which the caption is being maintained (e.g., ACTION).
Language	The primary language code for the caption (e.g., ENG).

2.1.1 Secondary Selection Criteria

This grid displays the captions for the primary language based on the *Code* selection:

Field Name	Description
Value	The specific value or short code being translated (e.g., A, D).
Language	The language code for the caption (e.g., ENG).
Caption Text	The descriptive text for the value in the specified language (e.g., Add, Delete).

2.1.2 Other Languages

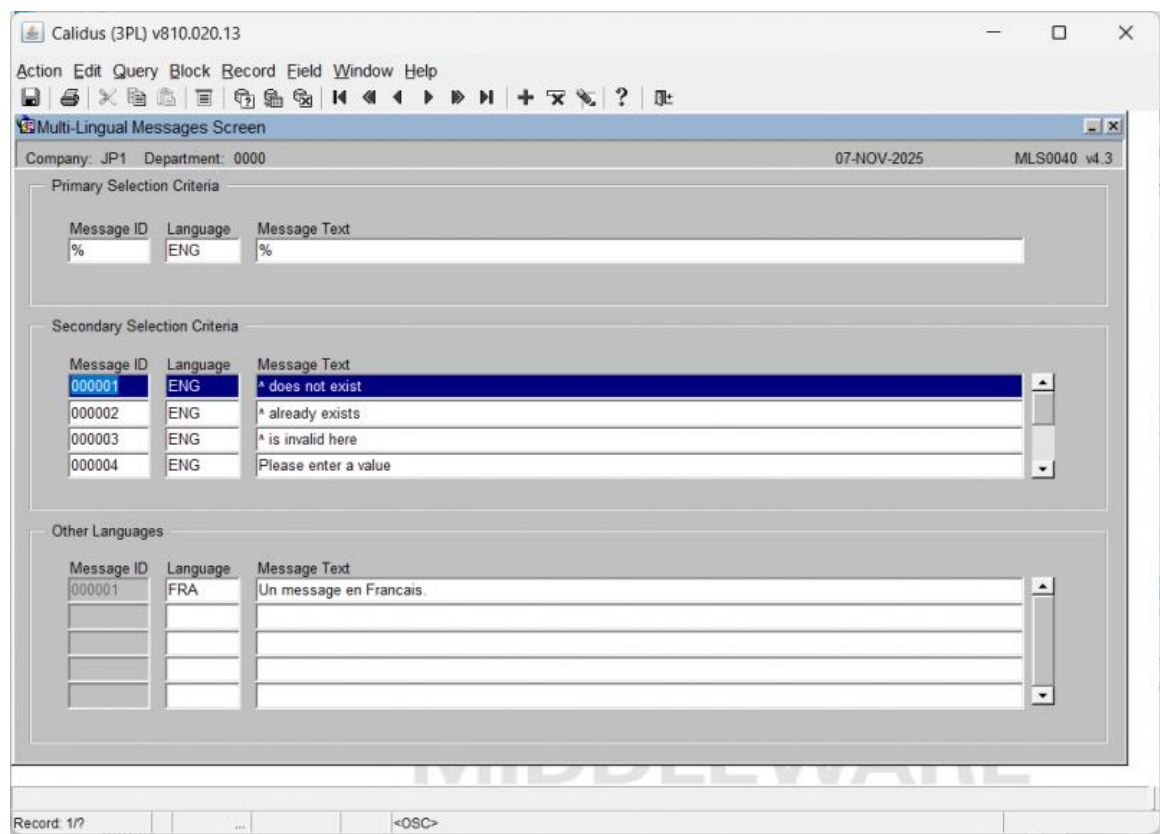

This grid displays the corresponding captions for other languages:

Field Name	Description
Value	The specific value or short code being translated (e.g., A).
Language	The language code for the non-primary language (e.g., ESP, SWE).
Caption Text	The descriptive text for the value in the foreign language (e.g., Add).

3 MLS0040

This is the *Multi-Lingual Messages Screen* screen (MLS0040).

3.1 Primary Selection Criteria

These fields define the key message record being edited:

Field Name	Description
Message ID	The internal system identifier for the message (e.g., %).
Language	The primary language code for the message (e.g., ENG).
Message Text	The text content of the message in the primary language.

3.1.1 Secondary Selection Criteria

This grid displays the messages for the primary language based on the *Message ID* selection:

Field Name	Description
Message ID	The specific message identifier (e.g., 000001, 000002).
Language	The language code for the message (e.g., ENG).
Message Text	The descriptive text content of the message in the specified language (e.g., *does not exist, *already exists).

3.1.2 Other Languages

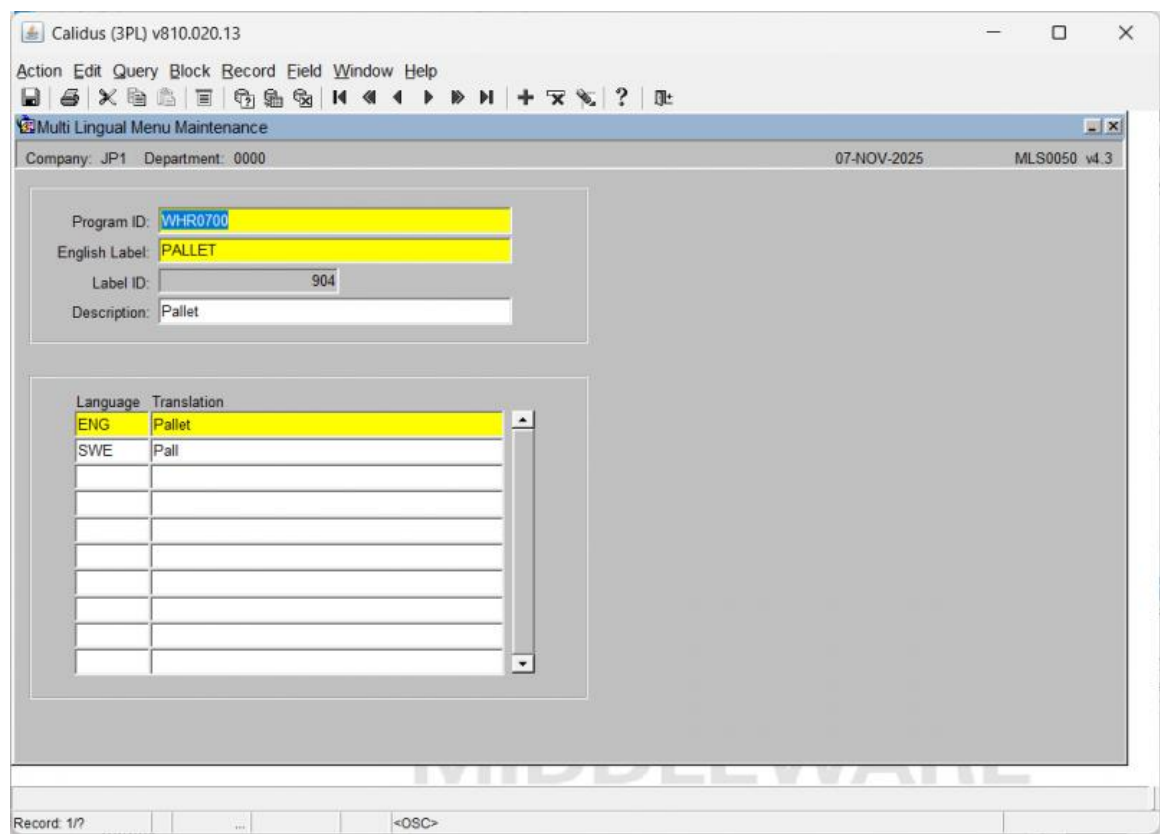

This grid displays the corresponding messages for other languages:

Field Name	Description
Message ID	The specific message identifier (e.g., 000001).
Language	The language code for the non-primary language (e.g., FRA).
Message Text	The descriptive text content of the message in the foreign language (e.g., Un message en Francais).

4 MLS0050

This is the *Multi-Lingual Menu Maintenance* screen (MLS0050).

The following fields identify the program and label being translated:

- | | |
|----------------------|--|
| Field Name | Description |
| <i>Program ID</i> | The unique identifier of the program or screen to which the label belongs (e.g., WHR0700). |
| <i>English Label</i> | The original label text in English (e.g., PALLET). |
| <i>Label ID</i> | The numerical identifier for the specific label within the program (e.g., 904). |
| <i>Description</i> | The descriptive text for the label (e.g., Pallet). |

4.1 Language Translation Grid

This table displays the translations for the identified label:

- | | |
|--------------------|---|
| Field Name | Description |
| <i>Language</i> | The language code for the translation (e.g., ENG, SWE). |
| <i>Translation</i> | The translated text for the label in the specified language (e.g., Pallet, Pall). |
