1 Template:Clear

Ready for **What's Next, Now™**

2 Template:Comment

Wikitext

```
 {{quote|text=Cry ?Havoc,? and let slip the dogs of war.|sign=[[William Shakespeare]]|date=01/01/1889}}
```

Result

Cry ?Havoc,? and let slip the dogs of war.
—William Shakespeare, 01/01/1889

2.1 Restrictions

If you do not provide quoted text, the template generates a parser error message, which will appear in red text in the rendered page.

If any parameter's actual value contains an equals sign (=), you **must** use named parameters. (The equals sign gets interpreted as a named parameter otherwise.)

If any parameter's actual value contains characters used for wiki markup syntax (such as vertical bar, brackets, single quotation marks, etc.), you may need to escape it. See [Template:!](#) and friends.

Be wary of URLs which contain restricted characters. The equals sign is especially common.

Inserts a comment or quote callout.

Template parameters

Parameter	Description	Type	Status	Text
text	1			

Quoted/commented text

String required **Person** sign 2

Quoted/commenting person

User required **Date** date 3

Date of comment

Date required

}}}}}}

—Someone, *Date*

Usage:

```
 {{Doc_Appendix
|Appendix=The Appendix Section. Defaults to A
|Glossary=WCS|WMS|CTMS|EPOD. Omit if no glossary is to be included.
|Ref1=First reference document title. There can be up to 5 (Ref2, Ref3, etc).
|RefV1=First reference document version
|RefDate1=First reference document date
|Rev1=Authorising Name. Up to 3 may be specified (Rev2, Rev3)
|Rev1Title=Job Title
|Estimate=Enter Y if an estimate section is to be included. Use the fields REQ, EST, FS, TS, DEV, ST, IMP for the values.
If the values are omitted, they default to Zero. Also include Client and Year for the correct rates
|Client=Client for estimate rates. Required if an estimate section is to be produced.
|Year=Year for estimate rates. Required if an estimate section is to be produced.
|REQ=Requirements Time. Defaults to zero.
|EST=Estimate Time. Defaults to zero.
|FS=Functional Specification Time. Defaults to zero.
|TS=Technical Specification Time. Defaults to zero.}}
```

|DEV=Development Time. Defaults to zero.
|ST=Testing Time. Defaults to zero.
|IMP=Implementation Time. Defaults to zero.
|FSEST=Y if this estimate is for production in a functional specification. Omit if no separate estimate and functional specification sections are required. If the values in the estimate differ from the functional specification, use the fields EREQ, EEST, EFS, ETS, EDEV, ESTT, EIMP to identify the Estimate values. If these are omitted, the Functional Specification values in fields REQ, EST, FS, TS, DEV, ST, IMP will be used.
|EREQ=Estimate Requirements Time. Defaults to the value specified in REQ if omitted.
|EEST=Estimate Estimate Time. Defaults to the value specified in EST if omitted.
|EFS=Estimate Functional Specification Time. Defaults to the value specified in FS if omitted.
|ETS=Estimate Technical Specification Time. Defaults to the value specified in TS if omitted.
|EDEV=Estimate Development Time. Defaults to the value specified in DEV if omitted.
|ESTT=Estimate Testing Time. Defaults to the value specified in ST if omitted.
|EIMP=Estimate Implementation Time. Defaults to the value specified in IMP if omitted.
|FOC=Free of Charge - set this to Y to ensure no cost is associated. Defaults to N.
}}

 **Note:** Ensure that you include the relevant Category tag at the bottom of the page.

_____ (PRINT) {{{Rev1Title}}} _____

4 Template:Doc Title

A first document page. Use {{Doc_Title}} passing in the parameters below.

Template parameters

This template prefers block formatting of parameters.

Parameter	Description	Type	Status	Client
-----------	-------------	------	--------	--------

The client, customer or Aptean

Default

Aptean

Example

Aptean

String required **Title**

The title of the document this title is for.

Example

Administration - Access Control Guide

String required **System**

The system to which this document pertains

Suggested values

C-TMS CALIDUS C-ePOD C-MCS C-Portal C-Portal TTM C-WMS

Default

C-TMS

Example

C-TMS

String required **Date**

The date of production

Default

31st December 2024

Example

31st December 2024

Auto value

String required **Version**

The version number of the document, e.g. v0.01, v1.00, v2.01. Include the v.

Example

v0.01

String suggested **Reference**

A reference for the document. This could be a SalesForce or DevOps reference e.g. SCR-CTMS-12345678-01, or a general reference e.g. ADMINISTRATION

String required **Sysver**

System Version

Example

12.45

Numbersuggested

5 Template:DocLink

This is a template to create a link to a PDF document export for a particular page. This is achieved with {{DocLink|MyPage}}

Template parameters

Parameter	Description	Type	Status	Page name
-----------	-------------	------	--------	-----------

Parameter **Description** **Type** **Status** **Page name**

The name of the page that the document will be produced from. Can also be the name of a category by specifying the Category namespace e.g. Did You Know, or Category:Accounts

Page name required **Doc Description**

If not provided, this DocLink will simply show "DOC", otherwise the text provided here.

String optional

Examples:

- {{DocLink|Main Page}} - **DOC**
- {{DocLink|Main Page|The Main Page in PDF form}} - **The Main Page in PDF form**

6 Template:EPOD Glossary

Term or Acronym	Meaning
General Definitions	
EPOD	Electronic Proof of Delivery. The OSL EPOD system is <i>CALIDUS</i> ePOD. This also comprises the basis of the Service Completion system <i>CALIDUS</i> eServ.
Server	The portion of the <i>CALIDUS</i> ePOD/eServ systems that controls all the data and sends information to and receives updates from the mobile device.
Mobile Device; PDA	The device used by the driver to perform the jobs. Typically an Android mobile device or tablet.
Site	The site usually defines the depot, business or the transport group (carrier). It can be set to any value required by the customer. All transactions data (for example, loads and jobs) and standing data (for example, vehicles and uses) belong to a site. An EPOD user, on a device or in the Admin screen, can only see data for one site at a time.
Load	A single journey for the driver with a set of work attached. A load is identified by a unique load ID. This may also be referred to as a worklist or workload.
Job	Also Consignment. A single task for the driver as a specific location. This could be the collection of goods or the delivery of goods. Jobs may also be Services (for example, servicing, installing or de-installing a boiler). A job is identified by a unique job ID but can also have other references held against the job (e.g. job code, SO number, customer reference and external reference).
Job Group	Jobs must be tagged with a Job Group. All jobs tagged with a single job group are processed in the same way. The job group has configuration associated to it to control such items as: POD/POC Report settings; Pre-Job actions (such as signing at a gatehouse); Post-Job actions (such as who signs for the item, are photos required); configurable fields required for entry for the jobs; Terms and Conditions displayed and; driver/user process (such as photos required for cancellation, comments/notes allowed). The job group can be used for any or all Sites, and the configuration against the job group can be different in each site. Job Groups can also be restricted from Admin and Remote users, so that certain users only see jobs for certain groups.
Container	A generic term for any object that contains the items being collected or delivered. Examples of containers are: Pallet; Package; Carton; Item; Cage. A special container "Loose Products" - see Product below. A container is identified by a container ID which is unique to this physical container.
Product	A product is any goods that are being collected or delivered where the product has a 'Product Code' which identifies what the product is but which does not uniquely identify each individual item. A product will also have a quantity associated with it to indicate how many items of this 'Product Code' are being collected or delivered. Products can either be processed within a 'Container' or as 'Loose Products' without a 'Container'.
Owner	The owner of the order that created the job. Typically this is the sales team that took the order and will be responsible for dealing with queries from the customer regarding the status.
Operator; Executor	The Site (depot or carrier) that is executing the load or loads that are involved in the delivery of the items.
Item Related Definitions	
Job Code	A reference associated with a job or job(s). This reference is common to connected jobs, for example this would be the same on both the collection of goods and the associated delivery of the same goods. Typically this would be the transport unique reference.
SO Number	A reference associated with a job which indicates the "Sales Order Number" this job is associated with.
Customer Reference	A reference associated with a job which has been provided by and will be recognised by the customer.
External Reference	A reference associated with a job which does not match any of the existing references, usually because it has been provided by an external system.
Pallet	An alternative for 'Container'. The term pallet is used when the operation only uses portable platforms as the container for goods.
Package	An alternative for 'Container'. The term package is used when the operation only uses boxes or wrapping as containers for goods.
Package Code	A code representing the type of 'Container'.
Package Desc	A description of the type of 'Container'.
Product Code	A code which identifies what a product is.
Item	A generic term for any individual item that can be collected or delivered. An item can represent a 'Container' or a 'Product'. This can also be used as an alternative for 'Container' when the operation only treats the goods as individual items, i.e. not as identifiable products.

Term or Acronym	Meaning
Service Item	An item which will be serviced by a service job. See action 'Service'.
Issue Life	The time after which an item is no longer fit for purpose.
Pack Size; Case Quantity	A product may consist of a full quantity of items, inside a pack. The Pack Size (or Case Quantity) defines the amount of this product contained in a single pack. For example, if there are 85 items to deliver, with a pack size of 24, the number of full packs is determined to be 3 (24 * 3, or 72), with the remaining (13) being 'loose' quantity. This is displayed as "3/13" on the mobile application.
UOM; Item Type	Unit of Measure; The major (case) UOM. This can optionally be displayed on the mobile device when changing product quantities.
Product Type	A classification of the product being delivered. For example, a company may deliver 7 different mortar products and 80 different concrete slab products. The Product Types may be set to "MORTAR" and "SLABS". This may be used to attach additional configuration, changing the data required when collecting or delivering these product types.
Status Definitions	
Status	An indicator of how far through the processing a 'Job', 'Container' or 'Product' has progressed.
Pending	A status indicating that the processing has not yet started, but is required to be completed.
In Progress	A status indicating that processing has started but not yet finished.
Complete	A status indicating that the 'Job', 'Container' or 'Product' has been collected or delivered.
Complete (Amended)	A status indicating that the 'Job', 'Container' or 'Product' has been collected or delivered but that some changes or amendments have been made. This means that not everything that was planned to be collected or delivered was collected or delivered, some items may have been cancelled or some products may only have had some of the planned quantities collected or delivered.
Complete (Claused)	A status indicating that the processing has been finished but that a 'Clause' condition has been recorded for this item.
Claused	See 'Complete (Claused)' and action 'Clause'.
Cancelled	A status indicating that the processing of this item or job is no longer required.
Cancelled at Collection	A status indicating that the delivery of a container or product is no longer required because the associated collection of this container or product was cancelled.
Submitted	An optional status that applies only to a 'Job' and which occurs after the 'Job' has been completed. This indicates that any time and expenses information recorded for the 'Job' has been submitted back to the server and can no longer be altered.
Action Definitions	
Start	An action associated with a 'Job' meaning the driver is about to start the processing of this job or jobs. This action will mark the job(s) with a status of 'In Progress'.
Arrive	A conditional action associated with a 'Job' meaning the driver has arrived at the location the goods should be collected from or delivered to.
Continue	An action associated with a 'Job' meaning the driver has previously performed the 'Start' and/or 'Arrive' action and has exited the processing screen but is now going to continue the processing.
Collect	An action associated with a specific 'Container' or a 'Product' meaning the driver has collected the 'Container' or 'Product'. This action will mark the 'Container' or 'Product' with a status of 'Complete' or 'Complete (Amended)'.
Collect Claused	An action associated with a specific 'Container' or a 'Product' meaning the driver has collected the 'Container' or 'Product' but with a condition under which the collection was accepted. This action will accept the clause condition and then mark the 'Container' or 'Product' with a status of 'Complete (Claused)'.
Deliver	An action associated with a specific 'Container' or a 'Product' meaning the driver has delivered the 'Container' or 'Product'. This action will mark the 'Container' or 'Product' with a status of 'Complete' or 'Complete (Amended)'.
Deliver Claused	An action associated with a specific 'Container' or a 'Product' meaning the driver has delivered the 'Container' or 'Product' but with a condition under which the delivery was accepted. This action will accept the clause condition and then mark the 'Container' or 'Product' with a status of 'Complete (Claused)'.
Clause	An action associated with a specific 'Container' or a 'Product' that has already been collected or delivered meaning the collection or delivery has been accepted with a condition. This action will accept the clause condition and then mark the 'Container' or 'Product' with a status of 'Complete (Claused)'.
Cancel	An action associated with a 'Job', 'Container' or 'Product' meaning the collection or delivery will not be performed for this 'Job', 'Container' or 'Product'.

Term or Acronym	Meaning
Submit	An optional action which can conditionally be carried out after a 'Job' has been collection or delivered meaning that any/all required expense or time recording for this 'Job' has been completed and can be submitted back to the server.
Service	A service of a service item or items. Typically, Installation, Deinstallation or Service. The process of a service usually encompasses Pre- and Post-work checks, information gathering and diagnosis and resolution notes. Additional references (MC Refs) may also be captured.
Actioned	A general term describing completing a job. So, 'Actioned' may be used instead of 'Collected', 'Serviced', 'Delivered'.
Consolidate	The action of taking several jobs and linking them together, so they are actioned at the same time with one start, arrive and signature.
Deconsolidate	The action of taking a consolidation of jobs and breaking them down into the component jobs again.
Job Swap	The action of selecting an existing load not assigned to the user, and picking jobs to transfer onto the user's load.
Signature Capture	Usually the final action of a job, where the customer's name and signature are entered.
Other Definitions	
Reason Code	A code which represents the reason that a job was cancelled or an item was cancelled or clause.
Vehicle	The vehicle used for transporting the goods.
Vehicle Checks	Also Defect Checks. A series of questions representing the results of checks intended to ensure the vehicle is in an acceptable condition.
Metrics Entry	A series of questions to capture information either at the start or end of a 'Load'.
Driver	The person performing the collections or deliveries; the user of the device/application.
Engineer	The person performing the services; the user of the device/application.
Customer	The person/company the goods are being collected from or delivered to.
Signatory	The name of the person providing a signature.
T&Cs	Terms and Conditions. The T&Cs are shown when signatures are prompted for. The text of the T&Cs are defined in the system itself.
Transfer Load	A load select from which to swap jobs to the user's load.
Base	E.g. 'Return to Base'. Typically the depot from which the driver departed.
Unplanned Ad Hoc Collection	A collection job that is created by the driver, usually after delivering to a customer.
Ad Hoc Container Entry/Scanning	The process of adding containers (items) to a job that have not been pre-advised on the job.
Completion Report	POD, POC, Service/Work Report.
Load Assignment	The action of assigning a vehicle and/or a driver to a load.
Job Assignment	The action of putting jobs onto a load.
Collection/Delivery Windows; Access Windows	Periods of time between which it is acceptable to deliver or collect from that customer. This has limited use in the system, mostly for reporting purposes.
Location/Map Terms	
Lat-Longs; GPS Co-ordinates, GPS Position	Latitude and Longitude co-ordinates, specified together as a single entity, identifying the exact position of a location. There are multiple formats - CALIDUS ePOD uses decimal notation, for example "53.3490818,-2.8521498" identifies the OBS Logistics office building in Liverpool.
GPS	Global Positioning System; the satellite system used to obtain a GPS position, for use with navigation and location positioning.
Geocode; Reverse Geocode	Geocoding is the process of obtaining lat-longs from an address. Reverse Geocoding is the process obtaining an address from lat-longs.
Geofence; Geofence Break	A Geofence is a perimeter around a location. A Geofence Break occurs when a device passes through this perimeter on entry or exit from the location.

```

E.g.

Log Number	Client Ref	Log Priority	CR/D	Issue Raised and Test Objective	Site	Functional Area	Reporter	ER Number	ESI Change Required	WCS Change Required
-	3				u/a			N	N	

19 Template:PATCHModDeliveredTableRow

 **Note:** This is part of a table - ensure it is wrapped in table HTML code.

Usage:

```

<table border="1px" width="100%">
<tr>
<td bgcolor="silver"><font size="2">'''Module Name'''</font></td>
<td bgcolor="silver"><font size="2">'''Version No'''</font></td>
<td bgcolor="silver"><font size="2">'''Description'''</font></td>
<td bgcolor="silver"><font size="2">'''Log Number'''</font></td>
</tr>
{ {PATCHModDeliveredTableRow
|ModuleName=Package Name
|VersionNo=Package Version
|Description=Package Description
|LogNumber=The Supimix Log Number
}}
{ {PATCHModDeliveredTableRow
|Package Name
|Package Version
|Package Description
|The Supimix Log Number
}}
</table>

```

Module Name	Version No	Description	Log Number

20 Template:PATCHRegSettingsTableRow

 **Note:** This is part of a table - ensure it is wrapped in table HTML code.

Usage:

```
<table border="1px" width="100%">
<tr>
<td bgcolor="silver"><font size="2">'''Log Number'''</font></td>
<td bgcolor="silver"><font size="2">'''Path & Name'''</font></td>
<td bgcolor="silver"><font size="2">'''Setting Value'''</font></td>
<td bgcolor="silver"><font size="2">'''Result'''</font></td>
</tr>
{{PATCHRegSettingsTableRow
|LogNumber=The Supimix Log Number. Leave blank if multiple values
|Name=The Path and Name of the Registry Setting. Leave blank is multiple values
|Value=The setting value. If left blank, default to 'Any Other Vlaue'
|Result=The expected result of setting the Registry Setting as the Value specified
}}
{{PATCHRegSettingsTableRow
|The Supimix Log Number. Leave blank if multiple values
|The Path and Name of the Registry Setting. Leave blank is multiple values
|The setting value. If left blank, default to 'Any Other Vlaue'
|The expected result of setting the Registry Setting as the Value specified
}}
</table>
```

Log Number	Path & Name	Setting Value	Result
{{{1}}}	{{{2}}}	Any Other Value	

21 Template:PATCHScreensTableRow

 Note: This is part of a table - ensure it is wrapped in table HTML code.

Usage:

```

<table border="1px" width="100%">
<tr>
<td bgcolor="silver"><font size="2">'''Log Number'''</font></td>
<td bgcolor="silver"><font size="2">'''Suggested Menu Path'''</font></td>
<td bgcolor="silver"><font size="2">'''Screen ID'''</font></td>
<td bgcolor="silver"><font size="2">'''Description'''</font></td>
</tr>
{ {PATCHScreensTableRow
|LogNumber=The Supimix Log Number
|Menu=The suggested menu path
|ScreenID=The screen ID
|Description=Description of the screen
}}
{ {PATCHScreensTableRow
|The Supimix Log Number
|The suggested menu path
|The screen ID
|Description of the screen
}}
</table>

```

Log Number	Suggested Menu Path	Screen ID	Description

22 Template:Portal Glossary

Term	Definition
CALIDUS Portal	A suite of web tools designed to provide a limited functionality within particular CALIDUS products. The terms below describe the tools available. Comprises core portal functionality, plus modules - see Portal WMS, Portal TMS, Portal TTM, Portal Gateway.
Supplier Portal	A suite of tools for CALIDUS TMS, for creation of orders, labels and load building. See Portal TMS.
LOTS	Live Order Tracking System. See Portal TTM.
CALIDUS Online	A suite of tools for CALIDUS WMS, comprising Preadvice creation, Order Creation, Enquiries and Reports. See Portal WMS.
CALIDUS WebOrdering	Specific CALIDUS WMS tools for the creation of orders by sales teams, from specific product catalogues. See Portal WMS.
CALIDUS Portal WMS	Specific Portal module for functionality relating to CALIDUS WMS.
CALIDUS Portal TMS	Specific Portal module for functionality relating to CALIDUS TMS.
CALIDUS Portal TTM	Track and Trace Module. A system fed by multiple other systems (including other CALIDUS systems like TMS, WMS, EPOD, etc) that provide a full track and trace of an order throughout its lifecycle, plus tools for light CRM/event management, and end customer tracking tools (through Gateway).
CALIDUS Portal Gateway	A simple front-end to view track and trace information against an order. Usually provided through an emailed web link to the end customer.

23 Template:Prettytable

class="wikitable" style=""

24 Template:REQ SCR Footer

 **Note:** To be used with [Template:REQ_SCR_Header](#) and [Template:REQ_SCR_Line](#) only.

25 Template:REQ SCR Header

 **Note:** To be used with [Template:REQ_SCR_Line](#) and [Template:REQ_SCR_Footer](#) only. Usage:

```
{ {REQ_SCR_Header} }
```

SCR#	System	Area	Description	Estimate	Notes
------	--------	------	-------------	----------	-------

26 Template:REQ SCR Line

Note: To be used with [Template:REQ_SCR_Header](#) and [Template:REQ_SCR_Footer](#) only.

Usage:

```
{ {REQ_SCR_Line
| SCR=The SCR number
| System=System affected
| Area=The area affected
| Description=Description of change
| Estimate=Cost or Days
| Notes=Notes cross-references
| Days=Estimate in Days? (Parameter Omitted-Adds f, Y-removes f, N-replaces with NA)
} }
```

Note: Typically, Days for estimate require EST, FS, ST, IMP and DEV. To apply a simple modifier (e.g. 70%) use the following notation in the estimate parameter:

```
{ {#expr: myest*1.7 } }
```

where *myest* is the number of days.

{{{SCR}}}		0.00
-----------	--	------

27 Template:SCR

SCR SCR--{{{SCRNo}}}:

27.1 Usage

The following includes the text passed to the template, and uses a table to stop the text flowing round the icon. The example shows how this may be used within an FS or REQ document template. If not, replace the parameters with literals.

```
 {{SCR
|Reference={{#var:Reference}}
|SCRNo={{ #vardefin echo: SCR | {{ #expr: {{ #var: SCR }} + 1 }} }}
|Definition=The text describing the change
}}
```

SCR SCR-123456-1: The text describing the change

28 Template:TCM Glossary

Term or Acronym	Meaning
WMS	Warehouse Management System, controlling all of the actions within a warehouse, like goods in/out, relocation, stock management, etc. The Aptean WMS is CALIDUS 3PL WMS (C-WMS).
WCS	Warehouse Control System, executing all of the actions within a warehouse, like goods in/out, relocation, stock management, etc, usually through mobile devices. The Aptean WCS is CALIDUS WCS (C-WCS).
TCM	Terminal Container Management, a system for managing container yards and the tasks inbound and outbound from it. The Aptean container yard management system is CALIDUS TCM.
ToC	Transfer of Custody; Traffic Control; The action of controlling vehicles arriving and departing into warehouse bays. The Aptean traffic control system is CALIDUS ToC.
Bay Diary	The use of timed slots into or out of bays within a warehouse is called a Bay Diary. A Bay Diary system also controls booking slots, arrival and departure statuses, labelling, etc. The Aptean Bay Diary system is called CALIDUS Bay Diary.
Container Yard; Container Storage	Where containers are stored.
Seals	Containers are sealed at source and whenever they are opened in transit, to ensure that the contents are not tampered with.
Container	A container consists of an ID, Type and Status.
Container ID	The unique ID of the container. This defines many properties of the container, such as which tasks (in the container yard and in the warehouse) are associated with it.
Container Type	The type of container. E.g. 20ft container. Refrigerated Container
Container Status	A quick guide to where the container is up to. Values from E(Empty)/F(Full)/ED(Empty/Damaged)/FD(Full/Damaged).
Vessel	Ship.
Voyage	A specific journey of a vessel.
Voyage Reference	(Vessel Tasks Only) The unique reference of the voyage of a vessel.
Registration	The vehicle registration (road) or voyage reference (voyage).
Location	A location in the yard. E.g. BAY001, TRAIN001. Locations may be stacked, and therefore the sequence of the container in a location is important.
Position; Sequence	Referring to locations, it is specifically the position in which the container is located in a location. For example, the lower sequence container in a stack may not typically be moved without first moving any higher-sequenced containers first.
Reference	(Road Tasks Only) Job Reference that is used to identify the job on Work In Progress mode. This field is automatically generated depending on Haulier, date and time. This field can be manually edited.
Account ID; Account Name	The client account id and name. The account that the order(s) relate to.
Haulier	The Haulier used to bring to goods to/from the container yard. Only available for entry for Gate- and Road-based tasks
Carrier	The carrier used. Only available for Vessel based tasks.
Service	The service used. Only available for Vessel based tasks.
Movement; Movement Type; Task	A movement of a container to a location, between locations, onto or off a vessel or from the road. The type of movement/Task - e.g. Inbound Gate, Outbound Vessel etc.
Hazardous; Hazardous Type	Indicates if the container contains a hazardous substance or material. The hazardous types indicate what category of hazardous material is stored, which aids in determining compatibility with other containers of the same hazardous type.
UN #	If the container is flagged as hazardous, this will show the relevant UN number
Order #	The order number associated with the task
GRN	Goods Received Number. A unique identifier for a goods receipt. In Container Yard terms, this will be the action of taking goods off a vessel or out of a container and storing them in the warehouse.
Reference	Job Reference that is associated with the task
Booking Reference	Reference from Bay Diary
Outbound Vessel; Inbound Vessel	The direction of the vessel's voyage. In other words, are items being loaded onto the vessel, or taken off the vessel. In many cases, there can be a planned inbound and outbound vessel task for any vessel's voyage.
	Tasks arriving or departing through the road network

Term or Acronym	Meaning
Inbound/Outbound Road	
Inbound/Outbound Rail	Tasks arriving or departing through the Rail network
Inbound/Outbound Gatehouse	Tasks arriving or departing at the gatehouse
Task Status; Unconfirmed; Confirmed	Items are created at an "unconfirmed" state and need to be confirmed for them to be made available for users to execute.
General System Terms	
EDI	Electronic Data Interchange, a mechanism for sending information between computer system, such as receiving orders, voyages, etc.
RDT; PDA; Mobile Device	Radio Data Terminal; Personal Digital Assistant. Essentially, any kind of mobile, wireless device. Used for mobile users when accessing the system, for example, with WCS when controlling the movements of pallets in the warehouse, and outside container movement tasks.
SCR	Software change request
App Terms	
Auto-Complete	When typing into a textbox, matching selections will be shown in a drop-down list below, as you type.
Drop-down List; DDL	Clicking on the entry box will show all applicable values below.
Checkbox	A simple yes/no, enabled/disabled indicator. If it is checked, this means yes/enabled, else no/disabled. You can change the state by clicking on it.
Textbox	Any field in the system which is designed to allow you to type into it, rather than click, select or other kind of action. These can be specific types (numeric, text, and other types of pattered entry. Text boxes can also be auto-complete.
Tab	A Tab is a kind of button that hides more things to enter. When you click it, the extra fields on the tab are shown, typically hiding others in the same tab group. In these guides, tabs are denoted by their label, in <i>italics</i> .
Button	Any pressable or clickable button that instigates an Action. In these guides, buttons are denoted by their label in Bold
Field	A Field is a place to see or enter data. This can be a textbox, checkbox, drop-down list, cell, etc. Typically they will be associated with a label that shows what this field is for. In these guides, fields are denoted by their label, in <i>italics</i> .
Table; Grid	Results represented in a tabular notation, Consisting of Rows and Columns. Typically with a Header row. Individual data is in a Cell.
Keys	Keyboard presses. In these guides, keys are denoted by their key in fixed formatting e.g. ENTER.
Menu	The menu of the system is typically situated on the left of the screen, and is typically activated by clicking the menu button. Again, typically this is denoted by 3 horizontal lines stacked on top of each other. Clicking the button will show the menu. Clicking again will hide the menu. Each menu contains menu items, or menu groups, which can also contain menu items. A menu item will take you to the screen it describes.
Find; Filter; Search	Associated with finding data, and the matching results being shown in a results table or screen. Typically, Find/Search means finding the data initially, whereas filter means getting the results, and then narrowing them down, typically through the use of a filter or search text box, either filtering the whole result set and all columns, or specific filters per column. Usually, typing in the filter will immediately filter the results as you type.
Export	Usually associated with a results table or data on a screen, if allowed, there will be buttons to export the data shown from the system to your local PC, typically as a Spreadsheet (XLS), PDF or CSV.
Sort	Usually associated with tables, this is the action of sorting the data Ascending or Descending (smallest to biggest, lowest to highest, earliest to latest, or vice versa). Usually, this involves clicking on the table row column header, each click cycling between Ascending or Descending.
Action	An action is a general term showing something you as a user want to do. Typically this is associated with a button to press (Confirm , Next , OK , etc). Clicking or pressing this button will usually take you to the next step.
Step	A step is a stage in a process. For example, a simple movement of a container from one location to another might consist of the following steps:
<ol style="list-style-type: none"> 1. Enter a location 	

Term or Acronym	Meaning
	2. Enter a container 3. Enter the new location

29 Help:Templates

If you have standard texts you want to include on several pages, the MediaWiki template feature comes into play.

29.1 Creation

Templates are standard wiki pages whose content is designed to be **transcluded** (embedded) inside other pages. Templates follow a convention that the name is prefixed with "Template:", assigning it to that namespace; besides this, you can **create them like any other wiki page**.

The simplest use of templates is as follows. If you create a page called "Template:Welcome" with contents:

```
Hello! Welcome to the wiki.
```

you'll have created your first template! If you then insert the code:

```
 {{Welcome}}
```

in any other page, when that page is viewed the text "Hello! Welcome to the wiki." will appear instead of {{Welcome}}. The template content is "transcluded" into the other page, i.e. it is integrated in the page.

You can then insert {{Welcome}} at any point of any page where you wish to welcome someone. Suppose it is used in 100 pages. If you then change the template contents to:

```
Hi there! Welcome to this wonderful wiki.
```

and revisit any of the 100 pages where the template was used, you'll see the new text instead of the original one. In this way, you have changed the content of 100 pages without editing them, because the template is transcluded into these pages.

This is the basic mechanism. There are several additional features of transclusion that enrich this mechanism and make templates very useful.

29.2 Usage

Templates can be used in other pages in these ways:

- {{Name}}, described above, 'transcludes' (i.e. includes a copy of) the content of the template (stored in the page [[Template:Name]]) whenever the page containing the template transclusion is fetched and displayed; i.e. if the template is later changed, the displayed transcluding page will automatically change too
- {{subst:Name}} replaces that string with the contents of the template, in the source of the transcluding page, when you save that page; the copy of the template contents can then be edited normally (and separately from the original in the template page). *Note:* don't use this if you are looking to continually propagate changes from the source template to the page(s) that references it.
- {{safesubst:Name}} was introduced in [rev:61710](#) to allow for substitution that doesn't break transclusion, see [w:en:Help:Substitution#The safesubst: modifier](#).
- {{msgnw:Name}} includes the template in a form that displays it as raw wiki syntax (the way <nowiki> does) when the page containing it is fetched.

In fact, an ordinary wiki page can also be used as a template, simply by specifying the namespace it resides in, so:

- {{Template:Pagename}} includes [[Template:Pagename]]
- {{Foo:Pagename}} includes [[Foo:Pagename]]
- {{:Pagename}} includes [[Pagename]]
 - ◆ {{subst::Pagename}} replaces itself with the contents of [[Pagename]]

If no such namespace exists, the full title is assumed to be a template:

- {{Foo:Bar}} includes [[Template:Foo:Bar]]

29.3 Parameters

To enrich the mechanism of transclusion, MediaWiki allows parameters to be passed to a template when it is transcluded. Parameters allow the template to produce different contents or have different behaviors.

Suppose you wish to insert a little thank you note in the [talk page](#) of other users, such as:

Template:Thankyou The thank you note will have a reason (in this case, "all your effort") and a signature ("Me"). Your objective is that any user is able to thank any other user, for any reason whatsoever.

So that the note will look similar everywhere it is used, you can define a template called **Template:Thankyou**, for example. Although the note should look similar whenever a user thanks another user, its specific contents (i.e. the reason and the signature) will be different. For that reason, you should pass them as parameters. If we ignore the remaining elements to format the box and place the image, the core content of the template will be this:

```
'''A little thank you...'''
for {{{1}}}.
hugs, {{{2}}}
```

Notice the use of {{{1}}} and {{{2}}}. This is the way to identify, within templates, the parameters that will be passed in when the template is used. Note that, within the template, each parameter is surrounded by **three** braces: {{{ }}}. This is different from normal template name usage.

When using the template on a page, you fill in the parameter values, separated by a pipe char (|). MediaWiki allows parameters to be passed to the template in three ways.

29.3.1 Anonymous parameters

To pass in anonymous parameters, list the values of those parameters sequentially:

```
 {{Thankyou|all your effort|Me}}
```

In this case, template {{Thankyou}} receives parameters {{{1}}}=all your effort and {{{2}}}=Me and produces:

Template:Thankyou

Inverting the order of the parameters:

```
 {{Thankyou|Me|all your effort}}
```

causes template {{Thankyou}} to receive parameters {{{1}}}=Me and {{{2}}}=all your effort and inverts the result:

Template:Thankyou So, the order in which anonymous parameters are passed in is crucial to its behaviour.

29.3.2 Numbered parameters

To pass in parameters by number, identify each parameter when passing it:

```
 {{Thankyou|2=Me|1=your friendship}}
```

This time, template {{Thankyou}} receives parameters {{{1}}}=your friendship and {{{2}}}=Me, though they have been supplied in inverse order, and produces: **Template:Thankyou**

29.3.3 Named parameters

The third way of passing parameters is by name, instead of numbers. In this case, the template contents would be changed to:

```
'''A little thank you...'''
for {{{reason}}}.
hugs, {{{signature}}}
```

Within the template, we use {{{reason}}} and {{{signature}}} to identify each parameter, instead of a number. To pass these parameters by name, identify each parameter when passing it:

```
 {{Thankyou|signature=Me|reason=being who you are}}
```

In this case, template {{Thankyou}} receives parameters {{{reason}}}=being who you are and {{{signature}}}=Me and produces:

Template:Thankyou The advantage of using named parameters in your template, besides also being flexible in the order parameters can be passed, is that it makes the template code much easier to understand if there are many parameters.

29.3.4 Default values

If you transclude a template that expects parameters, but do not provide them, in this way:

```
{ {Thankyou} }
```

in the numbered parameters example above you would get the following:

Template:Thankyou Since no parameters were passed in, the template presents the parameters themselves, instead of their respective values. In these cases, it may be useful to define *default* values for the parameters, i.e. values that will be used if no value is passed in. For example, if the template contents are changed to:

```
'''A little thank you...'''
for {{reason|everything}}.
hugs, {{signature|Me}}
```

then {{reason|everything}} defines that if no parameter {{reason}} is provided, then the value everything will be used. Similarly, {{signature|Me}}, defaults parameter {{signature}} to value Me. Now, transcluding the template again without passing any parameter, results in the following: **Template:Thankyou**

29.3.5 Control template inclusion

You can control template inclusion by the use of `<noinclude>` and `<includeonly>` tags.

Anything between `<noinclude>` and `</noinclude>` will be processed and displayed only when the template's page is being viewed directly.

Possible applications are:

- Categorising templates
- Interlanguage links to similar templates in other languages
- Explanatory text about how to use the template

The converse is `<includeonly>`. Text between `<includeonly>` and `</includeonly>` will be processed and displayed only when the page is being included. The obvious application is to add all pages containing a given template to a **category**, without putting the template itself into that category.

Note: when you change the categories applied by a template, the categorization of the pages that use that template may not be updated until some time later: this is handled by the **Template:Mediawiki**.

29.3.6 Organizing templates

For templates to be effective, users need to find them, and find out how to use them.

To find them, users can:

1. Click **Special Pages > All Pages**
2. In the **Namespace** list, choose **Template** and click **Go**.

To give usage information, include an example like this one on the template page:

```
<noinclude>
== Usage ==
Welcome users:
{{Thankyou|reason=your reason|signature=your signature}}
</noinclude>
```

Then, an editor can simply copy and paste the example to use the template.

29.4 Copying from one wiki to another

Templates often require **CSS** or other templates, so users frequently have trouble copying templates from one wiki to another. The steps below should work for most templates:

29.4.1 If you have import rights on the new wiki

1. Go to [Special:Export](#) on the original wiki. Enter the name of the template in the big text box, check "Include templates" and click Export. This will download a .xml file.
2. Go to [Special:Import](#) on the new wiki and upload the .xml file.
3. Look for CSS classes (like class="foobar") in the template text. If those classes appear in "MediaWiki:Common.css" or "MediaWiki:Monobook.css" on the original wiki, copy them to "MediaWiki:Common.css" on the new wiki.
4. If the template uses [ParserFunctions](#), you have to install the [Template:Mediawiki](#).

29.4.2 If you don't have import rights on the new wiki

1. Copy the template text to the new wiki; link to the original page in the edit summary for attribution.
2. Edit the template on the new wiki, and look through the list of templates at the bottom. The ones in red will also need to be copied from the original wiki to the new wiki. You may have to repeat this process multiple times before all dependency templates have been recognized and copied.
3. Look for CSS classes (like class="foobar") in the template text. If those classes appear in "MediaWiki:Common.css" or "MediaWiki:Monobook.css" on the original wiki, copy them to "MediaWiki:Common.css" on the new wiki.
4. If the template uses [ParserFunctions](#), you must install the [Template:Mediawiki](#).

29.5 See also

- [Help:External searches](#) - a template special use case example
- [Help:Magic words](#) - fancy stuff you may find in some templates
- [Help:Parser functions in templates](#)
- [MetaWiki:Help:Template](#) - contains a much more thorough manual on how exactly templates function
- [MetaWiki:Help:Embed page](#) - embedding pages from [namespaces](#) other than [Template](#):

30 Template:TestPlan_CycleFooter

 **Note:** To be used with [Template:TestPlan_CycleHeader](#) and [Template:TestPlan_CycleFooter](#) only.

31 Template:TestPlan CycleHeader

 **Note:** To be used with [Template:TestPlan_Test](#) and [Template:TestPlan_CycleFooter](#) only.

Note: In order to count cycles and tests correctly, you MUST include the variable defines Cycle and SubCycle as shown below. Usage:

```
 {{ #vardefine: Cycle | 0 }}{{ #vardefine: SubCycle | 0 }}
{{TestPlan_CycleHeader
|Cycle={{ #vardefineecho: Cycle | {{ #expr: {{ #var: Cycle }} + 1 }} }}{{ #vardefine: SubCycle | {{ #var: C
|Title=Area being tested in this cycle
|Notes=Any notes or prerequisites for the tests following.
}}
```

Step	Action	Result	Remarks	P/F
{{{Cycle}}}	{{{Title}}}			
	{{{Notes}}}			

32 Template:TestPlan Header

 **Note:** To be used as follows:

```
{ {TestPlan_Header
|Title=Title of test plan
|Log=Supimix log reference
|Description=description of what is to be achieved
|MenuAccess=Where on the menus the item can be found
|Prerequisites=The prerequisites of the test
|Objective=The details of what each group of tests is to achieve
|Tester=The tester
|Date=Test Date
} }
```

Test Script / Scenario Reference	<code>{{{Title}}}</code>	Call Number(s): <code>{{{Log}}}</code>
Test Script / Scenario Description	<code>{{{Description}}}</code>	PASS / ISSUES / FAIL
Menu Access	<code>{{{MenuAccess}}}</code>	
Pre-requisites	<code>{{{Prerequisites}}}</code>	Tested By:
Test Objective	<code>{{{Objective}}}</code>	Date:

33 Template:TestPlan Test

 **Note:** To be used with [Template:TestPlan_CycleHeader](#) and [Template:TestPlan_CycleFooter](#) only.

 **Note:** Ensure that you have defined SubCycle variable under CycleHeader - see that template for details.

Usage:

```
{ {TestPlan_Test
|Test={{ #vardefineecho: SubCycle | {{ #expr: {{ #var: SubCycle }} + 0.01 }} }} 
|Action=The actions to follow
|Result=The expected result
|Remarks=
|PassFail=
}}
```

0.00 {{{Action}}} {{{Result}}} | |

34 Template:Warning

The following displays the warning icon and the word 'Warning:'. You can follow this with whatever text/images/markup you like. {{warning}} Don't do that!. Alternatively, you can pass the warning text as the parameter, for example {{Warning|Don't do that!}}.

Template parameters

Parameter	Description	Type	Status	Text to be included	1
-----------	-------------	------	--------	---------------------	---

Warning text to be displayed in-line and indented.

String optional

35 Template:WCS Glossary

Term or Acronym	Meaning
Ad Hoc	A task instigated on the device (spec. Ad Hoc Pallet Move), rather than a task instigated from the WMS and Stock Control.
Advice Note Number	An external reference linked to a Goods Receipt.
Aisle	A component of a location; usually a space through rows of racking or storage locations; a collection of locations;
Anchor Point	A starting location for a search for a suitable storage location; auto-putaway location suggestion start point.
Area	A collection of aisles; an area in the warehouse for a particular purpose.
Batch	A production batch of a product; a quantity of product that is considered to have the same characteristics;
Bay (Warehouse)	A physical loading or unloading point for the warehouse.
Bay	A component of a location; usually a space between uprights in racking, comprising several levels (horizontal beams).
Block Stack	A stable stack of pallets.
Bulk	Bulk storage; Usually full-pallet storage areas, racked or stacked.
Cancellation	The facility to cancel a task due to some problem, identified by the user when performing the task.
Check Digit	A short code, usually randomly generated and stored against a location, used to help identify that a user is at the right location before they proceed with a warehouse task.
CSV	Character-separated values; a text file with multiple rows and values, usually separated with commas.
C-WCS	CALIDUS WCS, the name of the OBS Logistics Warehouse Control system
C-WMS	CALIDUS WMS, the name of the OBS Logistics Warehouse Management system
Dead Leg	A movement of a truck without a pallet; wasted resource.
Despatch	The final physical stage of an order; handover of goods to the haulier.
Drive-In	A drive-in location, typically multi-level, multi-deep location.
Dual Cycling	Processes utilizing P&D locations for interleaving tasks in and out of specific areas, reducing dead leg movements.
Exchange	Specifically Pick Exchange or Task Exchange. The process of allowing a user to select a different pallet in a multi-pallet location and exchanging the expected pallet for this one. If the pallet is planned for another task, task exchange will complete this task instead of the expected one first. If the pallet is not planned, pallet exchange will swap the pallet (if suitable).
GR; GRN	Goods Receipt; Goods Receipt Number or Note
High Bay	Typically tall (greater than 5 level) racking, usually full pallet storage, usually Narrow Aisle.
JIT	Just In Time; processes designed to trigger at the last instant.
KPI	Key Performance Indicator.
Level	A component of a location; usually the vertical compartments of an area, delineated by horizontal beams.
Loading	The act of loading pallets onto a vehicle.
Location	A uniquely identified space in the warehouse for storage of product. There are many types, most commonly Floor locations (for example, Marshalling, Inbound), Racking or Bulk Storage Locations and Pick faces.
Manifest	The contents of a vehicle or container.
Marshalling	The act of bringing pallets for an order or load together; an area to do so.
Multi-deep	A location with 2 or more pallets stored sequentially i.e. only one can be accessed at a time.
NA	Narrow Aisle; usually any area in the warehouse that is restricted access due to space limitations, Narrow Aisles have associate P&D locations.
P&D	Pick-up and Drop-off locations; locations used to control the handover of pallets between distinct areas, for example between chambers and the wider area of the warehouse.
PI; Perpetual Inventory	The act of continuously checking locations in a warehouse, identifying and correcting product quantity issues. Usually used in Bulk environments rather than Pick Faces. In pick faces, this process is called is called Residual Stock Balance and usually takes place after picking from a pick face.
Pick Face	A location designed for picking part of a pallet of stock. Usually a low- or ground-level location.
Pick List (order)	

Term or Acronym	Meaning
	The instructions to pick pallets or cases from locations; the paper report associated to this; the stage of preparing these instructions; the sending of these instructions to WCS.
PO	Purchase Order.
Pre-advice; Goods Receipt Pre-advice	An advanced notification of what is being received. Part of a manifest. Pre-advises can be stock and quantity, or individual pallet level.
Putaway	The physical move of a pallet to a storage location as a result of receiving it into the warehouse.
RAG	Acronym for Red/Amber/Green, a traffic light colouration system depicting (in sequence) Errors, Warnings or Informational messages. Usually used in operational monitoring to effectively display when certain processes are not working as expected.
RDT	Radio Data Terminal.
Replen; Replenishment	The act of moving product (usually a pallet) from bulk storage to a pick face.
Reposition	The facility to change the location of a movement or putaway when at the final destination, due to some issue discovered when performing the task.
RF	Radio Frequency; An RF device is an RDT, typically used by CALIDUS WCS for executing warehouse tasks.
SCR; CR	Software Change Request.
Short Pick	The process of not fulfilling an order due to failure to identify sufficient product when picking. May also be used as a term to indicate Short Allocation.
SO	Sales Order.
Truck Types	Plants, Mechanical Handling Equipment. For example, Reach trucks, Counter-balance trucks, pallet riders, etc.
UOM	Unit of Measure.
WA	Wide Area; usually any area in the warehouse that is not restricted access due to space limitations, for example, floor areas, not Narrow Aisle.
WCS	Warehouse Control System
WMS	Warehouse Management System

36 Template:WMS Glossary

Term or Acronym	Meaning
Ad Hoc (WCS)	A task instigated on the device (spec. Ad Hoc Pallet Move), rather than a task instigated from the WMS and Stock Control.
Advice Note Number	An external reference linked to a Goods Receipt.
Aisle (WMS)	A component of a location; usually a space through rows of racking or storage locations; a collection of locations;
Allocation (order)	The systemic act of identifying and ring-fencing product matching the order requirements, following proscribed warehouse rules.
Anchor Point (WMS)	A starting location for a search for a suitable storage location; auto-putaway location suggestion start point.
Area (WMS)	A collection of aisles; an area in the warehouse for a particular purpose.
Batch (WMS)	A production batch of a product; a quantity of product that is considered to have the same characteristics;
Bay (Warehouse)	A physical loading or unloading point for the warehouse.
Bay (WMS)	A component of a location; usually a space between uprights in racking, comprising several levels (horizontal beams).
Bay Diary	The mechanism for booking hauliers inbound/outbound and assigning bays. The OBS Logistics system is CALIDUS Bay Diary.
Block Stack	A stable stack of pallets.
Booking	A time slot for a bay, booked with a Carrier/Haulier.
Bulk (WMS)	Bulk storage; Usually full-pallet storage areas, racked or stacked.
Cancellation (WCS)	The facility to cancel a task due to some problem, identified by the user when performing the task.
Carrier; Haulier	The transport company (by road or sea).
Check Digit (WMS)	A short code, usually randomly generated and stored against a location, used to help identify that a user is at the right location before they proceed with a warehouse task.
Container	The actual physical container, identified uniquely by the Container Number. The Container will be identified as a Container Type.
Container Type	Descriptive of the use and capability and physical characteristics of a container. Container types are 40ft End Loader, Reefer, etc.
Container Yard	The storage areas for full and empty locations in the facility. The OBS Logistics system to manage this area is CALIDUS Container Yard.
CSV	Character-separated values; a text file with multiple rows and values, usually separated with commas.
C-WCS	CALIDUS WCS, the name of the OBS Logistics Warehouse Control system
C-WMS	CALIDUS WMS, the name of the OBS Logistics Warehouse Management system
Dead Leg (WCS)	A movement of a truck without a pallet; wasted resource.
Despatch	The final physical stage of an order; handover of goods to the haulier.
De-stuffing	The act of emptying a container and storing the contents in the warehouse.
Drive-In	A drive-in location, typically multi-level, multi-deep location.
Dry Van	Any type of non-refrigerated container.
Dual Cycling	Processes utilizing P&D locations for interleaving tasks in and out of specific areas, reducing dead leg movements.
EDI	Electronic Data Interchange; any form of automatically or semi-automatically uploading or downloading information from a computer system without manually re-keying the information.
ERP	Enterprise Resource Planning; a system for this.
Exchange (WCS)	Specifically Pick Exchange or Task Exchange. The process of allowing a user to select a different pallet in a multi-pallet location and exchanging the expected pallet for this one. If the pallet is planned for another task, task exchange will complete this task instead of the expected one first. If the pallet is not planned, pallet exchange will swap the pallet (if suitable).
GR; GRN	Goods Receipt; Goods Receipt Number or Note
High Bay	Typically tall (greater than 5 level) racking, usually full pallet storage, usually Narrow Aisle.
Inbound (Booking)	A booking linked to a Goods Receipt.
JIT	Just In Time; processes designed to trigger at the last instant.
KPI	Key Performance Indicator.
Level (WMS)	

Term or Acronym	Meaning
	A component of a location; usually the vertical compartments of an area, delineated by horizontal beams.
Loading	The act of loading pallets onto a vehicle.
Location (WMS)	A uniquely identified space in the warehouse for storage of product. There are many types, most commonly Floor locations (for example, Marshalling, Inbound), Racking or Bulk Storage Locations and Pick faces.
Manifest	The contents of a vehicle or container.
Marshalling	The act of bringing pallets for an order or load together; an area to do so.
Multi-deep	A location with 2 or more pallets stored sequentially i.e. only one can be accessed at a time.
NA (WCS)	Narrow Aisle; usually any area in the warehouse that is restricted access due to space limitations, Narrow Aisles have associate P&D locations.
Outbound (Booking)	A booking linked to a Sales Order.
P&D	Pick-up and Drop-off locations; locations used to control the handover of pallets between distinct areas, for example between chambers and the wider area of the warehouse.
PI; Perpetual Inventory	The act of continuously checking locations in a warehouse, identifying and correcting product quantity issues. Usually used in Bulk environments rather than Pick Faces. In pick faces, this process is called Residual Stock Balance and usually takes place after picking from a pick face.
Pick Face	A location designed for picking part of a pallet of stock. Usually a low- or ground-level location.
Pick List (order)	The instructions to pick pallets or cases from locations; the paper report associated to this; the stage of preparing these instructions; the sending of these instructions to WCS.
PO	Purchase Order.
Pre-advice; Goods Receipt Pre-advice	An advanced notification of what is being received. Part of a manifest. Pre-advises can be stock and quantity, or individual pallet level.
Putaway	The physical move of a pallet to a storage location as a result of receiving it into the warehouse.
RAG	Acronym for Red/Amber/Green, a traffic light colouration system depicting (in sequence) Errors, Warnings or Informational messages. Usually used in operational monitoring to effectively display when certain processes are not working as expected.
RDT	Radio Data Terminal.
Reefers	Refrigerated Containers.
Replen; Replenishment	The act of moving product (usually a pallet) from bulk storage to a pick face.
Reposition (WCS)	The facility to change the location of a movement or putaway when at the final destination, due to some issue discovered when performing the task.
RF	Radio Frequency; An RF device is an RDT, typically used by CALIDUS WCS for executing warehouse tasks.
SCR; CR	Software Change Request.
Short Allocate	The process of not fulfilling an order due to failure to identify sufficient product at Allocation.
Short Pick	The process of not fulfilling an order due to failure to identify sufficient product when picking. May also be used as a term to indicate Short Allocation.
SO	Sales Order.
Truck Types	Plants, Mechanical Handling Equipment. For example, Reach trucks, Counter-balance trucks, pallet riders, etc.
UOM	Unit of Measure.
WA (WCS)	Wide Area; usually any area in the warehouse that is not restricted access due to space limitations, for example, floor areas, not Narrow Aisle.
WCS	Warehouse Control System
WMS	Warehouse Management System

37 Template:Xref

37.1 Usage

The following includes the type, number and text passed to the template. The example shows how this may be used within an document template. If not, replace the parameters with literals.

```

{{#vardefine:Example|0}}
{{Xref
|Num={{#vardefineecho: Example | {{#expr: {{#var: Example }} + 1 }} }}
|Text=The text describing the cross-reference
}}

```

Example 1: The text describing the cross-reference

The following includes the type, number and text passed to the template. The example shows how this may be used within an document template. If not, replace the parameters with literals. <nowiki> {{#vardefine:Example|0}} {{Xref |Num={{#vardefineecho: Example | {{#expr: {{#var: Example }} + 1 }} }} |Text=The text describing the cross-reference }</nowiki>

Template parameters

Parameter	Description	Type	Status	Type
-----------	-------------	------	--------	------

The cross reference type e.g. Example, Table, etc

String required **Num** Num 2

The cross-reference number

Number required **Text** Text 3

The text to describe the cross reference.

String required
