1 Creating default damage and quarantine locations

It is possible within the system to create default damage and quarantine locations, where stock is automatically placed on hold when it is either moved into the location or received into it during the goods in process.

Locations will be created as standard with the exception of the Location Use type which must be set to either a value of '5' for a Damaged location or '8' for a Quarantine location. (See Below)

When the stock is placed into the locations they will be automatically placed on a system reason hold of either 97 for Damaged or 92 for Quarantine. It is possible to translate the system Code to a site specific code and description.

System Reason Codes Maintenance

Owner: XXA Warehouse: XX1 17-MAR-2010 WHS0085 v1.5

System Code	Description	Reason Code
92	Auto Quarantine	QA
97	Damaged Stock	DM

From Location Enquiry WHS0917 / Stock Location Enquiry WHS0902 the screens display the following information -

1. The Usage Type of the location
2. The Reason Code for the Hold and the description as entered in System Reason Code Maintenance (WHS0085)

Stock Location Enquiry

Owner: XXA Warehouse: XX1 17-MAR-2010 WHS0902 v4.10

Owner: XXA 001 Standard Client (3pl) Bonded: N Country of Origin:

Stock: 001001 Coca Cola 1*12

Pallet: 711 Cust Pallet: Location Code: QA/01/1 Usage: QUARANTINE

On Hand: 60 Weight: 511,200.000 KGM Rotation: ER3434 Receipt Number: 131

Held: 60 Weight: 511,200.000 KGM Cust Rotation no: ER3434 Date: 17-MAR-2010

Committed: 0 Weight: 0.000 KGM

Allocated: 0 Weight: 0.000 KGM Sell-By Date: 06-NOV-2010 Catch Weight: 0.000 KGM

Free: 0 Weight: 0.000 KGM Manu Date:

Trans In: 0 Weight: 0.000 KGM Movement: 0 To:

Trans Out: 0 Weight: 0.000 KGM

Reason Code	Hold Description	Held	Held Weight (KGM)	Hold Reference	Review Date	Time	Overlap
QA	Quality Assurance	60	511,200.000				YES

NOTE - IF stock is moved out of the location and back into the warehouse for general use, then a manual release of that pallet must be performed.
