1.1 Sequence Maintenance Grid	[,]

1 ENQSEQ001

This is the Med Sequence Translation Maintenance screen (ENQSEQ001).

The following fields document the enquiry and maintenance parameters:

Field Name Description

The unique identifier for the owner related to the sequence. (Required Entry) Owner Code

Advice Note No The specific advice note number associated with the sequence.

Action Buttons:

• Display Details: Retrieves and populates the grid with sequence records based on the current search parameters.

• New Enquiry: Clears the current search parameters and readies the screen for a new search.

1.1 Sequence Maintenance Grid

This table displays the list of MED sequences and allows for maintenance/deletion:

Field Name	Description
Warehouse	The identifier for the warehouse location.
Serial Number	The serial number or identifier of the item.
Med Sequence	The unique code or identifier for the specific MED sequence.
Description	A descriptive text for the sequence.
Advice Note No	The advice note number associated with this specific sequence record (column data).
Grn Num	The Goods Received Note number associated with the record.
Delete Action Buttons:	A checkbox or flag used to mark the sequence record for deletion.

- Select AII: Marks all records in the grid for action (e.g., selection or processing).
- De-Select All: Clears the selection or marks off all records in the grid.
- **Delete**: Executes the deletion of all records that have been marked using the *Delete* column checkbox.
