Buttons: Search, Refresh, Open, All.

The **Search** button will show the results, an a **Refresh** button is provided to allow you to refresh after some time has passed, to pick up the latest information.

This screen has a breakdown of the current 'Active' orders on the right hand side matching the criteria entered.

The *Details* tab shows a list of all orders matching the criteria entered on the *Selection* tab. You can see more information on this tab by scrolling the table horizontally.

You can drill down into details of the order selected using the **Order Enquiry** button. This will take you to the Enquiry by Order Number screen [ENQSOON01A](#).

You can configure the columns on this table using the **Configure** button provided.

[illegible]

This screen allows you to specify which fields should be displayed, their sequence and the width that will be displayed in the Stock Location Enquiry form, giving a more user friendly look.

The screen will show all configurable elements for the screen being configured. For example, if this is configuring the columns shown on results from **WHS0917**, this will be shown in the program ID on the top right.

The screen consists of two tables:

- Shown columns
- Available but not shown columns.

The arrow buttons allow you to select which fields you require and then to sequence the fields within the display. It is then possible if required to enter into the Width field and set the length of individual fields to save on the displayed space.

When finished, save your configuration and close the screen.
