1 FXMPASS Change Password

This screen allows you to change your password.

A screenshot of a Windows-style dialog box titled "Change Password". The dialog box has a title bar with a standard icon, a close button, and a maximize button. Below the title bar, there is a status bar showing the date "12-JUN-2025" and the version "FXMPASS v4.6". The main area of the dialog box contains four text input fields: "Username:" with the value "SCE", "Old Password:", "New Password:", and "Confirm Password:". At the bottom of the dialog box, there are two buttons: "OK" and "Cancel".

Enter your old password and your new password twice. Then click **OK** - this will change your password. Click **Cancel** if you don't want to change the password.
