1 INS9515 EDI Required Process Maintenance

This is the *EDI Required Process Maintenance* screen (*/INS9515*).

The following fields document the overall EDI process settings:

Field Name	Description
<i>Process Code</i>	The unique identifier for the EDI batch process.
<i>Next Run Status</i>	The status that the system will assign to the batch process for its next scheduled run.

1.1 EDI Required Grid

This table displays the list of required EDI processes and their status:

Field Name	Description
<i>Req Process Code</i>	The required EDI process identifier.
<i>Date Last Run</i>	The calendar date the process was last executed.
<i>Last Run Status</i>	The status code indicating the outcome of the last process run.
<i>Required Flag</i>	A flag (e.g., checkbox) indicating whether the EDI process is currently required or active.
