1 Label Formats

This document is intended to show the currently-available label formats within Calidus WMS.

The pictures are shown to illustrate the formats only and are not intended as indications of functionality within the system.

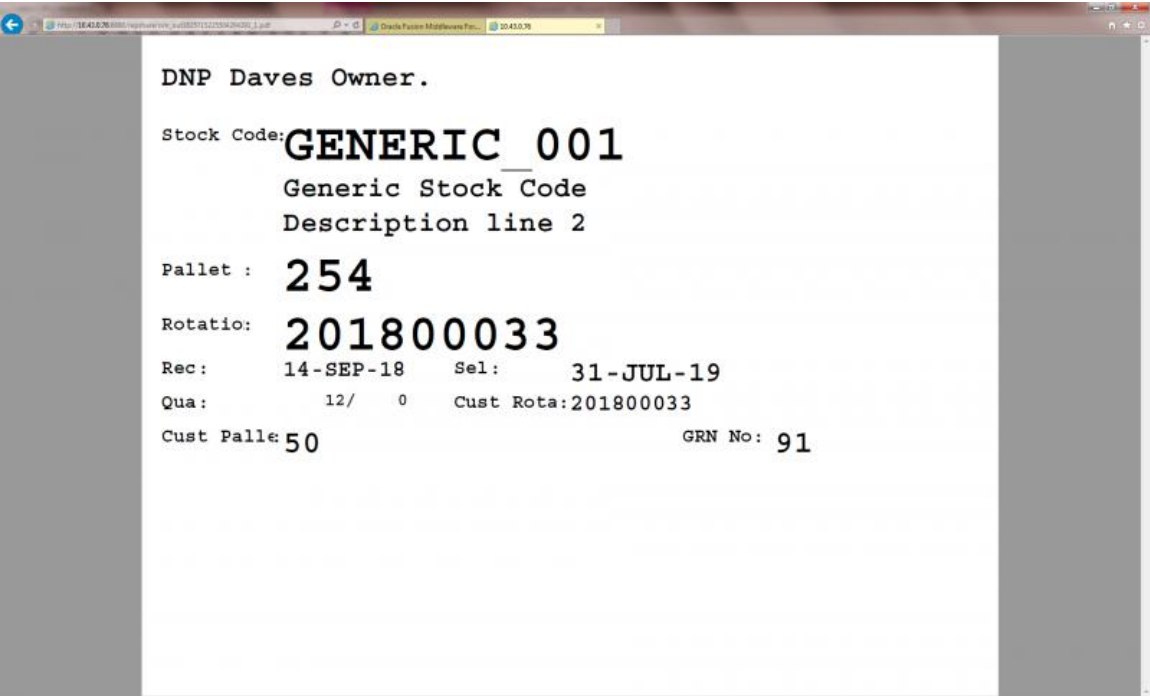

Where restrictions on the formats' use are in place, these are listed with the formats.

2 RECEIPT LABEL FORMATS

These are used during the receiving process to produce paper labels for the pallets as they arrive. They are generated through the Goods Receipt Confirmation screen (Pallet Labels)

2.1 Receipt Label

Format - PDF

Size - A4

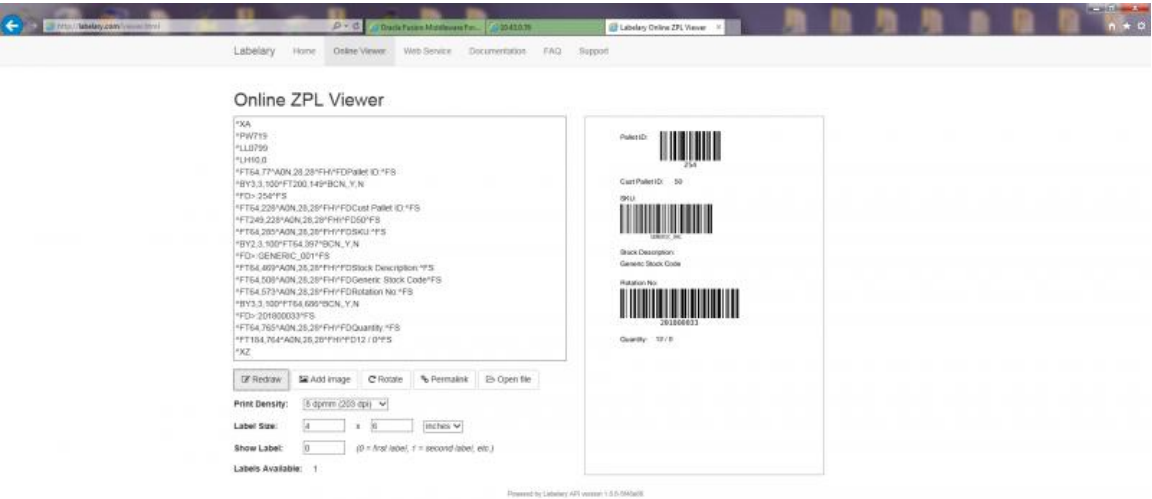

3 PALLET LABEL FORMATS

These are used during the receiving process to label the pallets as they arrive. They are generated through the Goods Receipt Confirmation screen (Barcode Pallet Labels)

These formats can also be used during the pallet enquiry process, although they may be missing some items.
