1 SOS7100 Deals Maintenance

This is the Deals maintenance screen.

The screenshot shows the 'Deals Maintenance' window. At the top, it displays 'Company: JP1 Department: 0000' and the date '10-JUN-2025'. The main form has several input fields: 'Owner' (JP1), 'Name' (empty), 'Deal' (empty), 'Start' (empty), 'End' (empty), 'Deal Price' (empty), 'Deal Discount' (empty), and 'Number of Items in Deal' (empty). There is an 'Audit' button. Below the form is a table with the following columns: 'Stockist Code', 'Stock Code', 'Description', 'Number of Items', and 'Mandatory'. The table is currently empty.

This screen allows you to set up stock codes that are part of a deal and will register discounts against the order.

Note: This functionality applies to NOMS processing ONLY.

1.1 Examples

The following example requires the user to order 2 of either of these stock codes to register the deal.

The screenshot shows the 'Deals Maintenance' window with example data. The 'Owner' is 'D1P' and 'Department' is '001'. The 'Name' is 'New User'. The 'Deal' is 'DEAL2'. The 'Start' date is '05-JAN-2017' and the 'End' date is '31-DEC-2024'. The 'Deal Price' is '1.00' and the 'Number of Items in Deal' is '2'. The 'Deal Discount' is empty. The 'Audit' button is present. Below the form is a table with the following columns: 'Stockist Code', 'Stock Code', 'Description', 'Number of Items', and 'Mandatory'. The table contains two rows of data:

Stockist Code	Stock Code	Description	Number of Items	Mandatory
D1P	001	01939390		
D1P	001	01939391		

Note: A stock code can not be applied to more than one active deal at any one time

In this example, users will need to order BOTH stock codes to gain the deal. If the 'Number of Items' was more than one, then that would be the quantity required to activate the deal.
