 **Warning:** This is an incomplete guide.

The screenshot shows the 'Stock Warehouse Maintenance' window. The title bar includes the application name and standard window controls. The top status bar displays 'Company: JP1', 'Department: 0000', the date '10-JUN-2025', and the version 'STKWHMT01A v4.4'. The main form is divided into several sections. The top section contains fields for 'Owner' (with values 'ROB' and '001'), 'Stock Code', and 'Warehouse Id'. The middle section is split into two columns of fields: the left column includes 'Minimum Qty:', 'On Hand Bonded:', 'Reorder Qty:', 'Min Cover Days:', 'Default Template No:', and 'Cross Dock:' (with a dropdown arrow); the right column includes 'Maximum Qty:', 'On Hand Unbonded:', 'Reorder Level:', 'Preferred Loc Types:' (with four small input boxes), and 'Pick Mode:'. The bottom section contains two rows of fields: 'Bonded' and 'Unbonded'. Each row has three input fields labeled 'Replenish Level Quantity', 'Pallets', and 'Replenish Amount Quantity'. To the right of these fields are two buttons: 'Bonded Stock Locations' and 'Unbonded Stock Locations'.

When you click **Unbonded Stock Locations** you will be taken to the Stock Location Maintenance screen [WHS7150](#).
