This works similarly to the Standard Cost maintenance screen.

Here, you can find existing stock codes. Enter the *Owner Code* and *Stock Code* (you can use LOVs) and execute the query. The screen will display the *Date From* and the *Base Selling Price* if any are found. **Note:** There may be multiple prices for a stock code, each effective from the Date From specified.

You may also enter a new applicable price here.

Enter the *Owner Code* and *Stock code* (again, using LOVs if required).

Then enter the *Date From* (when the price is active from) and the *Base Selling Price*. Then **Save** (CTRL-S) - the price will be saved, effective from the date entered.
