1 WHS0080 Reason Codes Maintenance

This is used to establish all of the Reason Codes that may be selected when performing a stock management transaction within the warehouse.

Reason Codes are two character abbreviations used to describe why a particular action within the system has been taken.

For example, reason codes needs to be entered for every stock adjustment, hold and pick adjustment.

Whether a reason code is to be used to hold stock or not, determines whether the hold code flags are set to Y or N.

Code	Description	Restricted G/B	Auto Rel	Rev Hrs	Inv	Hold Cd	Hold Type	Ser Hold	Ovl Fun	Abs Phy Hold Alloc	Reason Type	
01	Reason Code 01	Y	Good	N	0	N	Y	Physical	No	N	Yes	Blocked
02	Reason Code 02	Y	Good	N	0	N	Y	Physical	No	N	Yes	Blocked
03	Reason Code 03	Y	Good	N	0	N	N		No			
04	Reason Code 04	N	Good	N	0	N	N		No			Lost
05	Quar Reason 5	N	Good	N	0	N	Y	Physical	Yes	N	No	Quarantine
06	Quar Reason 6	N	Good	N	0	N	Y	Physical	No	N	No	Quarantine
07	New Instruments (0003)	N	Good	N	0	N	Y	Physical	No	N	Yes	Lost
08	Restricted2	Y	Good	N	0	N	N		No			
09	mmq	N	Good	N	0	N	N					
10	Restricted4	Y	Good	N	0	N	N		No			
11	Returned Stock Damaged Hold	N	Good	N	0	N	Y	Physical		N	No	
12	A Reason Code with a long desc	N	Good	N	0	N	Y	Physical	No	N	No	
21	Expired	N	Good	N	0	N	N		No			
81	GRN release	N	Good	N	0	N	N					
89	Reason Code 89	N	Good	N	0	N	N		No			
90	wms held	N	None	N	0	N	N					Quarantine
A2	allocated hold 2	N	Good	N	0	N	Y	Physical	No	N	Yes	
AD	Stock Adjustment	N	Good	N	0	N	Y	Fungible	No	Y	No	Blocked
AH	Allocated Hold	N	Good	N	0	N	Y	Physical	No	N	Yes	
AP	Awaiting Putaway	N	Good	N	0	N	Y	Physical	Yes	N	No	Blocked

Copy To All Warehouses

Note:

- The codes used to describe an adjustment must be clearly understood by the operational staff as the Description entered here is not shown throughout all of the screens during processing.
- The G/B field determines whether a reason code is good or bad. This functionality is mainly used within Sales Order Processing (Proof of Delivery) to determine whether stock should be written off or not.
- The user may see a different layout to this screen than the one shown here. This is based on a Program level registry setting 'WHS Layout Visible' under WHS0080. The versions shown here is the generic screen.
- The **Send** button will refresh the RF system with all employee detail information. Any additions or changes are automatically sent to the RF system on saving changes or adding a new record.
