1 WHS0090 Location Maintenance

This is the manual screen that allows the user to create each location code within the warehouse. The non-mandatory fields (not yellow) will be defaulted with the values shown in the figure below.

| Location Code | Area | Type | Use | Status | C/D | Bonded | Position | Use | Linked Loc | Pick Seq | Put Seq | Rdt Flag | Max Case | ABC Code |
|---------------|------|------|-----|-----------|-----|--------|------------|-----|------------|----------|---------|----------|----------|----------|
| 0100A | SE | NPB | 1 | Full | | No | Non-Linked | 4 | | 1 | 1 | Yes | 0 | A |
| 0100B | SE | NPB | 1 | Full | | No | Non-Linked | 4 | | 2 | 2 | Yes | 9,999 | A |
| 0100C | SE | NPB | 1 | Empty | | No | Non-Linked | 4 | | 3 | 3 | Yes | 2 | A |
| 0100D | SE | NPB | 1 | Empty | | No | Non-Linked | 4 | | 4 | 4 | Yes | 9,999 | A |
| 0100E | SE | BLK | 1 | Available | | No | Non-Linked | 4 | | 1 | 1 | Yes | 0 | |
| 01011 | SE | SPE | 2 | Full | | No | Non-Linked | 4 | | 5 | 5 | No | 0 | A |
| 01012 | SE | SPE | 1 | Full | | No | Non-Linked | 4 | | 6 | 6 | Yes | 0 | A |
| 01013 | SE | SPE | 1 | Full | | No | Non-Linked | 4 | | 7 | 7 | Yes | 0 | A |
| 01014 | SE | SPE | 1 | Full | | No | Non-Linked | 4 | | 8 | 8 | Yes | 0 | A |
| 01015 | SE | ALL | 1 | Available | | No | Non-Linked | 4 | | 9 | 9 | Yes | 0 | A |
| 01016 | SE | SPE | 1 | Full | | No | Non-Linked | 4 | | 10 | 10 | Yes | 0 | A |
| 01017 | SE | SPE | 1 | Full | | No | Non-Linked | 4 | | 11 | 11 | Yes | 0 | A |
| 01018 | SE | SPE | 1 | Full | | No | Non-Linked | 4 | | 12 | 12 | Yes | 0 | A |
| 01019 | SE | SPE | 1 | Full | | No | Non-Linked | 4 | | 13 | 13 | Yes | 0 | A |
| 01021 | SE | SPE | 2 | Full | | No | Non-Linked | 4 | | 14 | 14 | Yes | 0 | A |
| 01022 | SE | SPE | 1 | Full | | No | Non-Linked | 4 | | 15 | 15 | Yes | 0 | |
| 01023 | SE | SPE | 1 | Full | | No | Non-Linked | 4 | | 16 | 16 | Yes | 0 | A |
| 01024 | SE | SPE | 1 | Full | | No | Non-Linked | 4 | | 17 | 17 | Yes | 0 | A |
| 01025 | SE | SPE | 1 | Full | | No | Non-Linked | 4 | | 18 | 18 | Yes | 0 | A |
| 01026 | SE | SPE | 1 | Full | | No | Non-Linked | 4 | | 19 | 19 | Yes | 0 | A |
| 01027 | SE | SPE | 1 | Full | | No | Non-Linked | 4 | | 20 | 20 | Yes | 0 | A |
| 01028 | SE | SPE | 1 | Full | 8 | No | Non-Linked | 4 | | 21 | 21 | Yes | 0 | A |
| 01029 | SE | SPE | 1 | Full | | No | Non-Linked | 4 | | 22 | 22 | Yes | 0 | A |
| 01031 | SE | BLK | 1 | Available | | No | Non-Linked | 4 | | 23 | 23 | Yes | 0 | A |
| 01032 | SE | SPE | 1 | Full | | No | Non-Linked | 4 | | 24 | 24 | Yes | 0 | A |

If using the Automatic Location Maintenance screen, the Marshalling location must be created in order to enter this into the Default locations of System Parameters.

Note:

- **The location code** specified must be the total length of the aisle, bay and level code lengths defined in system parameters, main tab
- **The area code** must be one predefined in area codes maintenance
- **The use** determines what the location will be used for.

Standard values are:

- 0 - Preadvice Location
- 1 - Bulk Location
- 2 - Pick Location
- 3 - Receipt Location
- 4 - Returns Location
- 5 - Damaged Stock Location
- 6 - Marshalling Location
- 7 - Goods In/Out Bay Location
- 8 - Quarantine Location
- 9 - Replenishment Location
- D - Dynamic Pick Face
- M - Multi-Pallet Storage Location
- P - P&D (Pick and Drop) Location
- U - Units Pick Location

The Multi-Deep values specify how an M type location is used and validates:

- Position - one of
 - ◆ Front
 - ◆ Back
 - ◆ Non-Linked
- Use - one of:
 - ◆ 4 - Valid pallets contain the same stock, batch number and owner batch

- ◆ 5 - Valid pallets contain the same stock.
- ◆ 6 - Valid pallets contain the same stock and sell-by date.
- ◆ 7 - Check the last receipt location for pallets containing the same GRN and stock.
- ◆ 8 - Valid pallets contain the same stock and manufacturing date
- Linked Loc - if front or back, which location is this location linked to.
